This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

GOVERNOR'S MESSAGE.

EXECUTIVE DEPARTMENT,
SALEM, OREGON, Sept. 14, 1868.

Gentlemen of the Senate and
House of Representatives:

With cordial greeting I welcome you, on your coming together at the State Capital. In thus assembling to discharge the duties devolving upon us under the Constitution, it should be our first act to make known our gratitude to Almighty God for His goodness to us since last we met, and to ask His guidance in all that we do at this assembling. We have been the favored ones of the Republic. Neither War, nor Famine, nor Pestilence, have come within our borders. Peace, and Health, and Plenty, have held undisturbed dominion over us. And it gives me pleasure to say that the people of Oregon have not been unmindful of these blessings. Everywhere within our borders the hand of industry has wrought diligently, and a rapid development of all the material resources of our State has been the result. And as the servants of the people, and for the time being the custodians of their interests, it becomes our duty to exercise the powers thus conferred upon us in such manner as shall do the greatest good to the people whom we represent.

In my judgment, but little legislation is necessary at this session. A statute-book overburdened with needless enact-

Digitized by Google

ments is a public nuisance. Some slight changes may be necessary in order to perfect our system, but alterations should only be made where the necessity is apparent. The general good requires that but few innovations be made upon the statute. Nothing so tends to the security of personal rights as laws fixed and well defined, while constant changes unsettle the public mind, and involve everything in uncertainty.

INDIAN WAR.

I take great pleasure in communicating to you that the Indian war which for years has been carried on by the savages in the eastern portion of our State, resulting in the destruction of so much life and property, and to which I so earnestly called the attention of the last Legislative Assembly, has been brought to a happy termination. At its session in 1866, the Legislature passed a resolution authorizing the Governor to call out troops in case of emergency. Auxiliary to this, and in view of the necessity which I knew existed, I urged the Legislative Assembly to make an appropriation sufficient to enable me to respond to the appeals for help that were constantly being made by the citizens of the counties of Grant, Baker and Union; but for reasons unknown to me no appropriation was made, and I was left powerless.

The State, by every principle of right, is bound to give protection to all its citizens, and in my judgment a fearful responsibility rests somewhere for the long continued and fearful destruction of life and property by the hostile Indians upon our eastern borders.

Under the circumstances, I could only appeal to the United States military authorities. Upon them I urged the absolute necessity for immediate and vigorous measures to be adopted. And in justice to the Commander of the Department of the Columbia, permit me to say that every call for assistance was

Digitized by Google

promptly responded to, and everything done which could be done, to procure the only lasting peace which can be procured with hostile Indians—whip them into submission.

Too much credit cannot be given to Brevet Major-General George Crook for his courage, fidelity and untiring efforts in that behalf. Nor would I forget in this connection to mention the officers and men of his command, all of whom have done noble service, and deserve the thanks of the people of this State.

The people of Oregon may well congratulate themselves that a war which has proven such a hindrance to the development of one of the best portions of our State, and so destructive of life and property, has been thus brought to so happy a termination. A new era will now dawn upon eastern Oregon, and her vast fields, hitherto unoccupied, rich in silver and gold, and inexhaustible pasturage, will offer new inducements to the miner and the husbandman.

INSANE ASYLUM.

On the first of October, 1864, the Legislature authorized and directed the Governor to contract with Drs. Hawthorne & Loryea for the keeping, care, and medical treatment of all such insane and idiotic persons as should be sent to the Insane Asylum by the authority of law, for a period of four years and two months. That contract was awarded by my predecessor as the law directed. I therefore call your attention to the fact that the contract with Drs. Hawthorne & Loryea will expire on the first of December next, and recommend that suitable and proper arrangements be made for the care and treatment of these wards of the State. Humanity requires that everything which can be done should be done to alleviate their suffering and restore them to reason and their friends. I

Digitized by Google

therefore express the hope that the power vested in you, in this behalf, will be so wielded as to do the greatest good to these unfortunate beings.

It is my duty to state, in this connection, that the Asylum, under the management and direction of Drs. Hawthorne & Loryea, has, in my judgment, been conducted in the most satisfactory manner. For further particulars in this connection, I would respectfully call your attention to the report of Drs. Hawthorne & Loryea, and also to the report of Dr. J. S. Giltner, Visiting Physician, copies of which are herewith submitted.

The Constitution requires that among other public buildings, an asylum for the insane shall be erected at the capital of the State. A site has been purchased for that purpose. The location is a good one. And as soon as the financial strength of the State will permit, I think its best interests demand that suitable buildings be erected, and the management thereof be left to the exclusive control of the Legislative Assembly, as contemplated by the Constitution. It will necessarily take considerable time to erect suitable buildings, and as the contract for the keeping and treatment of the inmates of the Asylum will expire on the first day of December next, it will, in all probability, be found necessary for the Legislature to enter into a new contract with private parties for their keeping and treatment until such time as the Asylum shall be completed and the State ready to take charge of them.

Should it be found necessary to so contract with private parties, I would respectfully recommend that the price now paid, per capita, be reduced. After a thorough investigation of the subject, I am satisfied that the insane can be kept for a less sum than that now paid.

Digitized by Google

PENITENTIARY.

Since my accession to office, the Penitentiary has, I trust, been managed in such a manner as will give general satisfaction to you and to the people of the State. Beginning without buildings, and without systematized labor, a suitable temporary building has been erected, the best of police regulations have been established, insuring the safe-keeping of convicts, and labor has been so directed, aside from extensive permanent improvements made for the State, as to pay fifty per cent. of the entire expenditures of the Penitentiary.

I should fail to do my duty if, in this connection, I did not commend the Superintendent, Wardens, and officers of the Penitentiary for their vigilant and constant attention to the duties of their respective offices, and for the faithful manner in which they have served the State.

There is nothing which the people more earnestly desire, than that criminals, sentenced to imprisonment for violation of law, should be safely kept. To that end, I earnestly recommend that suitable buildings be erected, as soon as circumstances will permit, and that an appropriation be made therefor.

In order the more perfectly to secure the convicts, the Superintendent of the Penitentiary, in the autumn of 1866, leased the use of the "Gardner Shackle" for the State, until this session of the Legislature. I have no hesitation in saying that the use of that shackle was indispensable to the safe-keeping of prisoners, and therefore respectfully recommend that an appropriation sufficient to meet the indebtedness thus incurred, be made.

The experience of the last two years teaches me that

Digitized by Google

convict labor can be employed in the erection of the Public Buildings with a great saving to the State, if judiciously managed. Under the system now established, bricks of the best quality can be manufactured, in vast quantities, by the convicts, at a low figure. And inasmuch as the early erection and completion of the State Buildings is a public necessity, and believing, as I do, that prison labor can be more profitably employed in the furtherance of that work than in any other, I earnestly recommend that measures, looking to that end, be adopted.

Section 14 of Article 5 of the Constitution of the State confers upon the Governor the power to grant reprieves, commutations, and pardons, and, in connection therewith, requires that he shall report to the Legislative Assembly each case of reprieve, commutation, and pardon, together with the reasons for granting the same.

In obedience to that requirement, I submit that since the adjournment of the last Legislative Assembly, I have granted in all fifteen pardons, and one commutation; to which should be added one pardon granted by Hon. Samuel E. May, Secretary of State, and Acting Governor, during my absence from the State. The names of the persons pardoned, and commuted, together with the dates, and the reasons therefor, are as follows, to wit:

A. W. Sweet, pardoned on petition, Oct. 27th, 1866;

James Buchanan, pardoned because of partial insanity, and recommendation of Dr. H. Carpenter, Attending Physician, Dec. 19th, 1866;

Patrick Brown, commuted from the death-penalty to imprisonment for life, on petition, Dec. 24th, 1866;

Joseph McGraw, pardoned from county jail of Wasco county, on petition, March 25th, 1867;

Digitized by Google

Matthias Ming, pardoned on petition, Sept. 25th, 1857;

Henderson Simpson, pardoned on petition, November 26th, 1867;

Jack Long, pardoned on petition, Dec. 6th, 1867;

William Riley, pardoned on petition, and statement of Dr. H. Carpenter, Attending Physician, that he was afflicted with a disease of the heart, which disease was greatly aggravated by imprisonment, with a recommendation that he be pardoned, Dec. 6th, 1867;

Lorenzo D. Murphy, pardoned on petition, December 6th, 1867;

Frank Bolton, pardoned on petition, Dec. 16th, 1867;

John C. Hannon, pardoned, on petition, by Secretary of State, and, at the time, Acting Governor of the State, April 2d, 1868;

William Connor, pardoned on petition, May 25th, 1868;

John C. McCarty, pardoned on petition, June 27th, 1868;

John McCurran, pardoned on petition, and being but a child, July 8th, 1868;

William Bennett, pardoned on petition, Aug. 4th, 1868;

James Gregg, pardoned on petition, Aug. 4th, 1868.

The pardoning power is one of great responsibility, and ought to be exercised in those cases alone where justice demands it. And in many cases, so complicated are the attending circumstances, on the one hand, and so strong the appeals of humanity on the other, that it is hard to determine whether they are cases warranting the intervention of Executive clemency or not.

In view of this fact, the pardoning power has been used sparingly.

Oftentimes the appeals of humanity should be hushed, lest justice be offended.

Digitized by Google

For a more detailed statement of the management of the Penitentiary, I beg leave to call your attention to the very elaborate report of M. P. Berry, Esq., Superintendent of the Penitentiary, a copy of which is herewith transmitted. And would respectfully suggest, in this connection, that the recommendations made therein are worthy of your serious consideration.

SCHOOL LANDS.

By an Act of the Legislative Assembly of October 15th, 1862, the Governor was appointed a Land Commissioner; and, as such, authorized to locate all lands to which this State was entitled by Act of Congress. And, by the same Act, the Governor, Secretary of State, and State Treasurer, were constituted a Board of Commissioners for the sale of such lands, and the management of the Common School Fund. The requirements of the law have been faithfully observed in every particular, and a vast amount of labor performed, a full report of which is herewith transmitted, together with such recommendations as experience in the workings of the Board has suggested, to which your special attention is invited. The duties and responsibilities imposed upon the Commissioners are great and onerous, and I cannot forbear calling your attention to the fact that no provision has been made for their compensation. It is not the intention of the Constitution that labor should be performed without just compensation; and, independent of the Constitution, it is not right to require it. I hesitate not, therefore, to say that provision should be made for paying the Commissioners for their services.

COMMON SCHOOLS.

In reference to the workings of our Common School system, I have but little to communicate.

The reports from School Superintendents of the various

Digitized by Google

counties, are so meager, that it is impossible for me to give you any information upon the subject. From a few of the counties full and satisfactory reports have been received; while from others statements so indefinite were returned as to be of no value; and by some no reports were made whatever.

In this connection, to the end that uniformity may obtain, I would respectfully suggest that a general form for the reports of County School Superintendents be prescribed by law. A good system of Common Schools is indispensible to a free people. And I trust no pains will be spared to so perfect our system that a good English education shall be within the reach of every child in the State. All good argument is in favor of Free Schools. And I earnestly hope, and believe, that the time is near at hand when Oregon can boast of as good a system of Common Schools as any State in the Republic.

FINANCE.

I respectfully call your attention to the reports of the State Treasurer and Secretary of State, which contains a full statement of the financial operations of the State since the last Session of the Legislative Assembly. And in view of the prosperous condition of the State, and its freedom from indebtedness, I cannot too strongly urge upon you the importance of economical measures, and a careful avoidance of everything calculated to increase the burden of taxatian. I take great pleasure in assuring you that I will gladly cooperate with you, at all times, in any measure which has for its object the promotion of the general welfare, in the reduction of taxation, or in anything pertaining thereto which shall be deemed just and proper.

Digitized by Google

RAILROADS.

There is, perhaps, no subject inviting such general attention in this State as that of railroads. All see the importance of, and feel the necessity for cheap and easy transportation. A general system of railroads in Oregon is an absolute necessity. And I am proud to know that the people are thoroughly aroused upon this subject. There are at this time as many as six different railroad enterprises within the State in process of execution. The Salt Lake and Columbia River Railroad, connecting the Union Pacific Railroad with the navigable waters of the Columbia river; the Oregon Branch of the Central Pacific Railroad, running through the Rouge River, Umpqua and Willamette Valleys to the Columbia River and Puget Sound; the Oregon Central Railroad [West-side]; the Oregon Central Railroad [East-side]; the Salem and McMinnville Railroad, and the St. Helen's and Hillsboro Railroad—all of which are of vast importance to the people of the State. And while rival companies may be disposed to waste their substance in needless litigation, it is the manifest duty of the State, rising above merely local ambitions, and petty jealousies, to foster each and all alike. And I respectfully but earnestly recommend that you give all the encouragement you rightfully can to these great enterprises; avoiding all preferences, and seeking only the general good of the people.

IMMIGRATION.

All desire a rapid development of the State. For that purpose we need population. To obtain population but little effort is required. In my judgment a judicious and practical system of immigration ought to be fostered by the State. To that end I would respectfully recommend that a Bureau of Immigration

Digitized by Google

be established, whose duty it shall be to prepare statistical information concerning the resources of the State, and the inducements for immigration; and that an agent be appointed to visit all parts of the Republic, in the interests of such Bureau, and that a reasonable compensation be allowed such agent therefor. It may be argued that the organization of such an establishment would be a needless expenditure of the public moneys, and, therefore improper. I hope, however, that a more reasonable view of the subject will obtain.

That a large immigration can be induced, I am led to believe. And, if so, the expenditures made in that behalf would be a good investment. Aside from the development of the vast resources of our State, which would necessarily result from an influx of population, their poll-tax alone, to say nothing of the revenue arising from the fruits of the labor of such newly acquired citizens, would, in a short time more than replace the amount expended. Most of the sister States have established such an organization, and are profiting largely thereby; and it is our duty to see that Oregon runs not behind in the great race. I trust you will give the subject your serious consideration, and so act as best to promote the general interests of the State.

CUSTOM HOUSE, U. S. BRANCH MINT, &c.

My attention has been called, by the proper authorities of the General Government, to the fact that it is the purpose to erect buildings for a United States Branch Mint at Dalles City, a Custom House at Astoria, and a Court House, Custom House, and Post Office at Portland, and some Light-Houses along our western coast. Before this work, so long, and so much needed, can be begun, the State will have to give its consent, by enactment. I recommend, therefore, that appropriate legislation be had upon the subject, and every assistance rendered which will be calculated to further enterprises so important.

Permit me, also, to call your attention to the fact that there

Digitized by Google

is now no provision in the laws of the State for the admission of United States convicts into the State Penitentiary. The laws of the United States provide for the maintenance of such prisoners, and give the officers of the State Prison the proper authority in the premises. I therefore recommend that proper legislation be had upon that subject.

ESCHEATS.

I desire to call your attention to the condition of the estate of Finice Caruthers, late of Multnomah county, deceased. Sec. 7 of title 1, of an Act entitled "An Act to Regulate the descent of Real property, &c., passed October 24, 1864," provides, in effect, that if the intestate leaves no lineal descendants, or kindred, his real estate shall escheat to the State. In the fall of 1860, Finice Caruthers, an old resident of Multnomah county, died inestate, leaving a large landed estate, lying principally in Multnomah county, but partly in Lane and Washington counties. About three hundred acres of these lands are within the limits of the city of Portland.

The administrator of said estate, in 1867, filed his final account in the County Court of Multnomah county, in which it was represented that said Finice Caruthers left no lineal descendants or kindred, and that the estate, amounting to over one hundred thousand dollars, had escheated to the State of Oregon. The Court directed the administrator to retain possession of such estate, in pursuance of section 2 of title 3 of an act entitled "act for the recovery of real and personal property escheated to the State, and for the disposition of estates," &c., passed Oct. 17, 1862.—Subsequent to the settlement of the administrator's account, persons assuming to represent certain alleged heirs of Finice Caruthers, made claim to an undivided twenty-three sixtieths (23-60) of the entire estate, and instituted proceedings for the recovery

Digitized by Google

thereof. This claim is based upon the assumption that the real name of the deceased Finice Caruthers, always so known and called in Oregon, was Finice Thomas, and that the persons now making this claim are a portion of his first and second cousins and their assignees, and as such entitled to receive twenty-three sixtieths (23-60) of said estate.

It was made my duty by sections 2 and 8 of the act before referred to, to authorize the proper District Attorney to take the steps necessary for the protection of the rights of the State, and to employ counsel to assist. I therefore directed the District Attorney of the Fourth Jucicial District to appear in all actions, suits and proceedings pertaining to the enforcement of the rights of the State; and, in the fall of 1867, I employed the law firm of Mitchell, Dolph & Smith, of Portland, to assist the District Attorney in all matters pertaining to the same.

Various actions and proceedings have been commenced by the claimants, in the courts of Multnomah county, all of which, so far as determined, have resulted in decisions adverse to the claimants and in favor of the State. There is, at this time, one of these cases pending on appeal before the Supreme Court of the State. There are, also, three cases pending in the Circuit Court for Multnomah county. I am advised by the attorneys for the State that, in their judgment, the whole claim is fraudulent, and can be defeated in the courts.

Soon after the decease of Finice Caruthers, A. J. Knott and R. J. Ladd, of Portland, set up a claim, adversely to the estate, to a portion of the land—about 200 acres—included in such estate, and two cases, involving the title to this portion, are now pending in the Supreme Court of the United States. These cases are also being attended to by the firm of Mitchell, Dolph & Smith, under employment by me. There being no money on hand belonging to the estate, the lands have been sold for taxes the two years last past.

I would, therefore, urge upon you the importance of making

Digitized by Google

provision for the redemption of the lands so sold, and for the compensation of the attorneys employed, and other expenses incurred in the enforcement of the rights of the State to this valuable estate.

CONCLUSION.

In presenting this brief review of the condition of the State, possibly some things of importance have been overlooked; but it is your privilege to extend a helping hand. There is enterprise to be fostered, industry to be stimulated and encouraged, order to be maintained, and the broad principles of justice, equality and freedom to be enforced. That you will faithfully perform the duties before you, and, by judicious and wholesome legislation, strive to promote the general welfare, I have no doubt. Do your duty, and the approbation of a generous people and the protection of a just and all-wise Providence will be yours.

GEORGE L. WOODS.

SECRETARY'S REPORT.

OFFICE SECRETARY OF STATE,
SALEM, OREGON, September 5, 1868.

To the Legislative Assembly:

I herewith submit the biennial report of the transactions of this office, commencing September 3, 1866, and ending September 5, 1868, inclusive.

As required by law, I have carefully examined the books and accounts of the Treasurer, and the moneys on hand in the Treasury, and find them correct, and corresponding in the aggregate with the entries in this department.

As that officer gives in his report full details of all business transacted in his office, to avoid repetition and save unnecessary expense, I depart from my usual course, and present matters as concisely as possible, in the following order:

A —Statement of receipts by counties and from miscellaneous sources.

B —Estimated expenses.

C —Showing the balance due from counties.

D —Exhibiting the value of all property in the several counties for the year 1866.

Digitized by Google

E —Exhibiting the value of all property in the several counties for the year 1867.

F —Statement of the amount collected upon all property taxable in 1866, on account of interest and redemption of State bonds.

G —Statement of the amount collected upon all property taxable in 1867, on account of interest and redemption of State bonds.

H —Statement of funded debt.

I —General summary of taxable property, from 1858 to 1867.

K —Statement showing the amount of warrants drawn against the different funds.

ASSESSMENTS, RECEIPTS AND EXPENDITURES.

The total taxable property of the State, as assessed for the year 1866, was $25,560,312 63
And for the year 1867..... ..... 25,893,469 75
The amount of property tax received into the treasury on these assessments was..... $277,259 49
From poll tax 26,385 80
From Chinese tax..... 2,536 70
From military tax (1865)..... 371 56
The expenditures during the past two years, for ordinary purposes of the State government, and for which I have drawn warrants on the Treasurer, are..... $261,959 79
Taking the assessments of taxable property in the State for the years 1866–67, together with the present poll-tax, and allowing such reasonable increase in the assessment for 1868–9, under the custom heretofore followed by assessors in the various counties, there will be received into the treasury, for revenue purposes, for the next two years, about..... $318,000 00

Digitized by Google

For the same period there will be required, to meet the standing and ordinary appropriations necessary to carry on the State government and charities, together with warrants awaiting appropriation..... .....$300,711 82
of which 79,350 00
realized from one and one-half mills of the whole amount collected on real and personal property, is for interest and redemption of the funded debt; which, in connection with the amount to be paid for the old Penitentiary at Portland, and the balance due from counties, and the amount now in the General Fund, would leave a balance for extraordinary appropriations of..... ....$66,963 29
which you may be called upon to provide for during the present session.

I am confident that the present rate of taxation could with safety to the State credit, which I am proud to say is unimpaired, be materially reduced, if all the property of the State was assessed equally, and would thus be sufficient to meet all demands of necessary and prudent legislation. The Constitution and laws clearly intend that all property in the State shall be valued at its real worth, so that the burdens of taxation may be fairly and equally borne by all; and were the spirit and intent of the law properly carried out, the assessments would be more than double what they now are. Even though the forms of the law are adhered to in the administration of any public duty, prudence would dictate, that when a constant adherence to such custom leads to unfairness, by unequally distributing the burdens of government among the people of the State, proper remedies should be adopted to remove this injustice.

This inequality may be greatly diminished, if not entirely overcome, by the establishment of a Board of Equalization,

Digitized by Google

composed of competent men chosen from different sections of the State, to supervise and re-adjust the assessors' lists, which would have the effect to establish an equal grade of value for all property in the State.

Our State is advancing quite rapidly in population and wealth. New and great interests of public concern are springing up in every direction. The wants of agriculture and the increasing requirements of active and growing commerce all over the State, demand new channels of trade, and every possible improvement and enlargement of the already established means of communication, for the exchange of our surplus products. A well regulated system of taxation, by which all property shall be made to support, fairly and equally, the burdens of government established by law upon a consistent and enduring basis, would meet with universal favor, and afford means necessary to supply whatever demands development, and thus meet the wants of a growing, energetic, and public-spirited people.

The exhaustion of appropriations, which frequently occurs, and the fact that not unfrequently the Legislature has failed to make any appropriations, lead me to suggest the propriety of passing a general law under which the *ordinary* expenses of the State may be audited and paid. These expenses generally, and especially the fees and salaries of officers are fixed by law, and consequently the liability to abuse would not be greater, under a general law, carrying continuous appropriations, than under the present system of biennial appropriations. Estimates for one and two years in advance can, at the best, only approximate correctness, and, in case of deficiency, a serious injury is done to individuals without corresponding benefit or safety to the public interests; and a policy which, by a

Digitized by Google

mere technicality, prevents the payment of a just and legal claim when there is an ample amount of money in the Treasury to meet all demands, may be considered of at least doubtful propriety. The passage of an Act, carefully guarded and designed to remedy the existing difficulty, would, in my judgment, be a simple act of justice to individual claimants, and not injurious to the public.

Your obedient servant,

SAMUEL E. MAY.

Secretary of State.

OFFICE STATE TREASURER,
SALEM, Sept. 5th, 1868.

HON. SAMUEL E. MAY,

SECRETARY OF STATE:

SIR—I have the honor to transmit herewith, through you, to the Governor, the Biennial Report of this Department, showing the total receipts and disbursements of this office from Sept. 3d, 1866, to Sept. 5th, 1868, inclusive, together with the balances of former report.

Respectfully,

Your obedient servant,

E. N. COOKE,

State Treasurer.

REPORT.

OFFICE OF THE BOARD OF COMMISSIONERS,
FOR THE SALE OF SCHOOL LANDS AND THE MANAGEMENT
OF THE COMMON SCHOOL FUND.
SALEM, OREGON, Sept. 1, 1868.

To the Legislative Assembly of the State of Oregon:

GENTLEMEN:—In accordance with the provisions of Sec. 5, Art. IX., of the Constitution, and an act entitled "An act to further provide for the sale of school lands and to distribute the income of the common school fund," passed Oct. 24, 1866, the Board respectfully submit the following as their report of the transactions of this office to date:

The lands of the State, and to which the State is entitled by acts of Congress, may properly be classified as follows:

1st. School lands proper—*i. e.*, the 16th and 36th sections, or their equivalent where portions of such sections were held by donation claimants prior to the public surveys, and known in the General Land Office as "indemnity selections."

2d. University lands, consisting of seventy-two sections for the use and support of a State University.

3d. Five hundred thousand acres of land granted under the provisions of act of Congress of Sept. 4, 1841, for purposes of internal improvement; and which, for convenience and to avoid confusion, have been designated by the Board as "State lands."

4th. Ninety thousand acres of land granted for the support of an Agricultural College.

In addition to the above, grants have been made to the

Digitized by Google

State as follows: all "swamp and overflowed lands," reported as such by the Commissioner of the General Land Office; ten sections for public buildings; and seventy-two sections of saline lands. But as the duties of the Board relate more especially to the first four classes, they will be presented in the order as arranged.

When the Board, under the provisions of the act of Oct. 24, 1866, assumed the control of the school lands and funds, they were necessarily compelled to provide a complete set of maps of all the public lands of the State, as without such maps mistakes were unavoidable, which consumed some time before sales could be made. In the meantime, correspondence was had with the Treasurers and School Superintendents of each county, to ascertain the condition of the school fund and lands in their respective counties, which is exhibited herein.

Soon after the passage of the law, numerous applications to purchase school lands were made, and, in many instances, from several parties for the same tracts, and it soon became evident that the only method to adopt, in justice to the school fund and to parties desirous of purchasing, would be to first offer all the school lands at public sale, after due notice, at the several county seats; and after due consideration, the minimum price was fixed at $2 00 per acre; terms, one-third down for farming and grazing land, and one-half down for land chiefly valuable for timber, with interest on the deferred payments at the rate of ten per cent. per annum, payable semi-annually, on the 1st of January and July.

In pursuance of the above regulation, the first sale was made in Yamhill county, at Lafayette, July 9, 1867. For the details of sales as far as made, you are referred to Abstracts "A" and "B," as follows:

Soon after commencing the sale of school lands, the Board received official notice from the Register of the Land Office at Oregon City, that sales of indemnity selections could not be made until such selections had been certified and approved, coupled with the information that no selections heretofore made had been in conformity with law and instructions from the General Land Office. (See his communication below.) Such being the case, and a re-location, in compliance with instructions, of all such selections being necessary, not only to secure good titles to parties who had purchased in good faith such lands of the State, but as affording an opportunity to discard some such selections known to be worthless, and made in some cases with a view to secure quantity rather than quality, and to select, in lieu of such discarded selections, lands known to be valuable, and which would secure purchasers at once, and in many cases where a public sale would secure an advanced price, the Board, by their agent, made a re-location of all the indemnity selections in the Oregon City Land District, which have been duly certified to and forwarded to the General Land Office:

LAND OFFICE, OREGON CITY, OREGON,
September 18, 1867.

DEAR SIR:—In reply to your inquiries in relation to the fees charged by this office in the location or selection of lands by the State of Oregon, under grants by laws of Congress, I have to state that the first section of the Act of Congress of July 1, 1864—U. S. Statutes, vol. 13, page 335—entitled "An Act to regulate the compensation of Registers and Receivers of the Land Offices in the several States and Territories, in the location of lands by States," etc., provides—"That from "and after the passage of this Act, in the location of lands by States and corpor- "ations, under grants from Congress for railroads and other purposes (except for "agricultural colleges), the Registers and Receivers of the land offices of the sev- "eral States and Territories, in the districts where such lands may be located, for "their services therein, shall be entitled to receive a fee of one dollar for each "final location of one hundred and sixty acres, to be paid by the State or corpor- "ation making such location," etc.

Digitized by Google

The Commissioner of the General Land Office, in Circular No. 9, of May 30, 1866, rules, that "Under this law, the Registers and Receivers are EACH entitled "to receive a fee of one dollar for each final location of one hundred and sixty "acres, or any quantity approximate thereto, when the deficit is less than forty "acres."

Under date of August 27th, 1866, the Commissioner advised this office, by letter, that we "have a right to demand fees, under the Act of July 1, 1864, on ALL SE-"LECTIONS by the State under grants of Congress, except for agricultural colleges. "This, of course, includes selections under Act of 1841. The fees must be paid "before you certify the lists and transmit them to this office." (See copy of said letter herewith.)

In relation to the right of the State to dispose of lands selected as indemnity school lands, I submit the following extract from a letter of the Commissioner to this office, dated December 31, 1866, viz: "You will please at once notify the "authorities representing the State interest, that the title to lands recommended "by them, or by county authorities, as indemnity school selections, is not vested "by the United States until such selections have been regularly approved by the "Secretary of the Interior, and certified transcripts thereof duly forwarded."

It was in pursuance of said instructions that such notice was given you.

Very respectfully, yours,

OWEN WADE, Register.

HON. I. R. MOORES, Agent for locating lands, State of Oregon.

(Copy.) DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE, August 27, 1866.

REGISTER AND RECEIVER, Oregon City, Oregon—

Gents: In reply to the Register's letter of the 25th ult., I have to state that you have a right to demand fees under the Act of July 1st, 1864, on ALL SELECTIONS by the State, under grants by Congress, except for agricultural colleges. This, of course, includes selections under Act of 1841.

The fees must be paid before you certify the lists and transmit them to this office.

Very respectfully, your ob't serv't,

(Signed) JOS. S. WILSON, Commissioner.

As the Board is charged with the management of the School Fund, as well as the sale of the lands, one of their earliest acts was an effort to obtain information in regard to the condition of the school fund in each county. To that end a circular letter was sent to each school superintendent and treasurer, and reports were received from them,

Digitized by Google

in some cases in detail, showing amount of notes for coin, amount notes for currency, amount notes not specified, amount notes of doubtful value, &c., &c., in others simply an abstract of the amount. Believing that the intention of the Act of October, 1866, could be met by leaving the fund in the several counties where it had accrued, if it were kept in active use, the Board sent an appointment to the treasurer of each county to act as their local agent in the transaction of all business pertaining to the school fund in their respective counties, with the following instructions:

SALEM, OREGON, ... 1867.

Mr. .....

You are hereby authorized to act for the Board in ..... county, in the transaction of business in relation to school lands, funds, &c., under instructions which will, from time to time, be forwarded you.

You will receive, with this, a supply of blanks, notes and mortgages, upon which you will renew all notes and mortgages that may be due, as soon as practicable, and all others as soon as they reach maturity.

In any case where parties may be indebted to the school fund and do not or cannot pay the interest on notes now out, you are authorized to compute the interest to date, add the same to the principal, and take a new note for the amount, duly securing the same as now provided by law. See Statutes, page 887, sec. 12. As fast as funds accumulate in your hands, by payment of principal and interest, or either of them, you will promptly re-loan the same on the same terms.

You will observe there are two kinds of notes—Gold and Currency—principal and interest payable in kind borrowed. You will also observe, and impress upon the mind of borrowers, that PROMPT PAYMENT OF INTEREST WILL BE INSISTED ON IN ALL CASES.

The rate of interest is low (10 per cent. per annum), and the interest must be on hand (both simple, on the first and last six months, and the interest on the interest for the first six months), to enable the Board to make the annual distribution on the first of February, as required by law.

You will please forward, without delay, a detailed schedule of the notes, date, amount of principal and interest on all notes NOW in the school fund in your county, if you have not forwarded them heretofore, and monthly reports as hereafter instructed, for which latter reports blanks will be furnished you.

Borrowers to be at all expense for stamps, recording, etc.

By authority of the Board.

....., Agent.

Digitized by Google

Since when, so far as the Board have information, the fund has been well cared for. Prior to their taking charge of the fund, in some of the counties it had been well and carefully managed, and had constantly accumulated, while in others it had been much neglected, and as a consequence losses had occurred; in some cases, notes had outlawed; in others, they were insufficiently secured, and parties giving notes had changed their residence for parts unknown, while in all, indulgence in the payment of interest had been given, and months, and in some cases years, had passed without its collection.

By the Act of October, 1866, the Board were authorized to loan currency in their hands at current rates in coin; but the manifest injury which would result to the fund by pursuing such a course, when currency was surely though slowly approximating to coin in value, and in their judgment would eventually be worth par, and as this was a perpetual, irreducible fund, and the element of time was only a secondary consideration, they at once determined to keep both coin and currency distinct—each to itself—each to be loaned payable in kind, principal and interest. The rate of interest had been various, ranging in some counties from ten per cent. per annum, to two per cent. per month in others, with interest annually in some cases, and semi-annually in advance in others. This being essentially a State fund, in which the entire people of the State were interested, and general and uniform rules for its management being necessary, the Board, in the absence of any law to that effect, concluded to establish the rate at ten per cent. per annum payable semi-annually, on the 1st days of January and July of each year. The advantage of having interest days upon which the interest of all school fund notes shall be due and payable, especially in view of

Digitized by Google

a distribution of such interest throughout the State, will be apparent to all.

The Act referred to provided that on the 1st day of February, 1866, the interest collected the year ending Jan. 1st, 1866, should be distributed throughout the school districts of the State. The condition of the fund, as indicated above, made such a distribution at that time impracticable, and it also provided that a similar distribution should be made annually thereafter. The object of that enactment was evidently to benefit all the children of the State who are properly subject to our school laws and entitled to its advantages. From the few and in most cases meagre reports of school superintendents (though very complete and satisfactory in some instances) and the lack in some cases of full reports of the treasurers, it could not be equitably distributed, as some counties would have been deprived of any portion of such fund, and the Board, in the hope that this Legislature might make some necessary legislation amendatory of this Act, and the Act defining the duties of school superintendents in this connection, so that they might harmonize and be each rendered more efficient, concluded to not order the distribution, but let the fund continue to accumulate. A Bill will be submitted for your consideration embodying suggestions occurring by practical experience in the working of existing laws in relation to the school fund in its various relations, and to which your attention is respectfully requested. We submit herewith the condition of the school fund at this date, showing amount and where held.

AMOUNT OF NOTES AND CASH IN HANDS OF TREASURERS.

COUNTY.	AMOUNT.
Polk	$ 10,511 52
Josephine	1,369 50
Yamhill	4.121 19
Lane	26,904 10
Marion	29,485 23
Clackamas	6,989 34
Union	4,350 27
Linn	73,022 62
Benton	9,503 27
Washington	5,608 09
Douglas	26.087 19
Umatilla	2,900 00
Multnomah	1,874 02
Board of Commissioners	39,702 29
Total amount of School Fund	$242,228 63

We are unable to give the amount of unsold school land in the State, as the amount is constantly increasing by the extension of the public surveys; but there is unsold in the counties of Lane, Benton, Linn, Marion, Polk, Yamhill, Washington, Clackamas and Multnomah, 118,048 72-100 acres, which is approximately correct, much of which is good land and selling every day. If the State school lands are all sold, and the funds carefully managed, in a few years it will fully support a free school system. The interest on the school fund now on hand amounts to more than $24,000 per annum—or two thousand dollars per month; and by the plan adopted by the Board, viz.: collecting the interest on the 1st of July, and re-loaning it till January, the interest upon the interest will amount to over one thousand dollars per month; hence the necessity of insisting *in all cases upon the prompt payment of interest.* To that end the Board have adopted the following form of notes—upon which form all the old notes are being renewed

Digitized by Google

as far as practicable, and all new ones taken (a similar form has been used making the necessary alterations for coin):

....., Oregon, ..., 186..

..... year.. after date, ... promise to pay to the Board of Commissioners for the sale of School Lands and the management of the Common School Fund .... dollars, being for legal tenders borrowed on account of the ..... Fund, with semi-annual interest at ten per cent. per annum, to be paid PUNCTUALLY on the 1st day of January and July—principal and interest payable in lawful money of the United States—and in case the interest is not paid, as herein expressed, both interest and principal shall become due and collectible.

.....

The Act authorizing school superintendents to sell lands and execute deeds to purchasers having been repealed, and there being no specific authority to execute deeds to former purchasers, the Board have assumed that authority, their warrant for doing so being by fair implication of the statute of October 24, 1866.

Many clerical errors have been discovered in the description of lands heretofore conveyed to purchasers, and to avoid trouble and litigation, we would suggest that authority be conferred on the Board to execute corrected deeds to owners of such lands upon their filing with the Board satisfactory proof of the error.

In some cases land has been sold as school land which had never been located, and in some instances could not be located, as prior right of donation claimants interfered to prevent such selection. In two cases which have come to the knowledge of the Board, the parties purchasing had done so in good faith, paid for the land, and have ever since 1857, paid taxes on the same. They having an equitable claim against the State for relief for the original payment, with interest and taxes paid, we would suggest that the Board have authority given them to adjust and settle such claims, and report the same with all the evidence to the Legislature.

UNIVERSITY LANDS AND FUND.

The State is entitled, by grant of Congress, to seventy-two sections, or 46,080 acres of land for the use and support of a State University. There appears on the record to have been selected and approved 47,494 35-100 acres, (an excess of 1,414 35-100 acres) of which amount 3,509 47-100 acres were sold at the sales of August 1st and November 2d, and sales of the "Oregon City Claim" in '55, '56 and '63, realizing $9,788 59. From a misapprehension of the Act authorizing the sale of school land, many applications have been made to purchase university land; and should authority be given to sell those lands, a large proportion would find ready purchasers. From their location—generally in the mountains, or near the river, and valuable for timber—they offer a constant temptation to trespassers, which, unfortunately for the interest of the State, has been too often resistless. When we have had information of any trespass on these lands, prompt measures have been taken to prevent it, which have been successful except in one instance, where it became necessary to institute legal proceedings, which had the effect of relieving the State of one lawless citizen, and we have reason to believe exercised a wholesome influence in restraining others from the same unlawful acts. From the increase of population in the valley, those lands are needed, and are much sought after, and in the judgment of the Board ought to be offered for sale at an early day. And they would suggest that they be sold in the same manner—i. e., first at public and then at private sale—and on the same terms as the common school lands have been sold, believing that to be the best manner in justice to the university fund, and to parties de-

Digitized by Google

sirous of purchasing. There appears from the records and maps to be many conflicts with donation and pre-emption claimants, which will necessarily consume much time to adjust. The condition of the university fund will be shown by Abstract "E".

STATE LANDS.

Of the grant of 500,000 acres to the State by the Act of 1841, the whole amount, as nearly as could be ascertained, has been selected. The Board has been officially notified by the Secretary of the Interior of the approval of 299,876 28-100 acres of such selections: in the Oregon City Land District 220,361 35-100 acres, and in the Roseburg Land District 79,514 93-100 acres; of which amount 1,439 12-100 acres have been sold and conveyed to original claimants, or their successors in interest, at $1 25 per acre in currency, as provided by statute, and 520 acres sold to other parties at $2 00 per acre in currency—making 1,959 12-100 acres sold realizing $2,838 90, which amount in cash and notes was collected by the Treasurer of Union county, (where the lands sold were located,) and in whose hands, as agent for the Board for that county, such amount now is.

The following instructions were sent to the treasurer with the first transaction had in the above sales:

BOARD OF COMMISSIONERS, &c.,
"SALEM, Dec. 31, 1867.

"MR. MORROW,

"County Treasurer Union County:

"I enclose herewith a certificate of purchase (equivalent to a bond for a deed) and two notes for signature by ——, for state land purchased by him. As this is, doubtless, the commencement of a large amount of business of this kind, an explanation of the nature and regulations may be necessary concerning it.

"Owing to the peculiar nature of the state land matters, and the further fact that there are several classes of lands belonging to the State, viz.: school, university, &c., &c.,

Digitized by Google

and the large amount of land claimed by the State under the 500,000 acre grants, (and which latter in all legislation heretofore has been denominated 'school' land) and the necessity of keeping separate accounts for each class, the Board have decided to use the term 'state land' concerning all the latter class, as a matter of convenience and to prevent confusion. And, as the agent of the Board for your county, you will have to keep accounts for the 'state land fund' and the 'school fund' proper, you will please observe and keep them distinct. As the law, with its several amendments, is, in some particulars ambiguous, and in some contradictory, and as a large discretion is allowed the Board, they have established the following regulations:

"All actual settlers or claimants who have complied with existing laws at the time of filing their applications, can purchase such land as has been approved by the Commissioner of the General Land Office, at one dollar and twenty-five cents per acre in currency, and the payment of one-third of the purchase money, and the prescribed fee of five dollars in coin, and giving notes for the remaining two-thirds. A certificate or bond will then be issued and delivered to the purchaser.

"The notes will be retained by you for the convenience of the purchasers, in making payments of principal and interest. When paid in full, and the Board advised of that fact by you, a deed will be forwarded to you, for which you will receive, upon delivery, five dollars in coin. All other land, i. e., upon which no application has been filed, will be sold on the same terms and in the same manner for two dollars per acre in currency. * * * *

"By order,

"I. R. MOORES,

"Agent for the Board."

Digitized by Google

The greater portion of these lands were located in Union, Baker and Umatilla counties. In the effort to obtain land which should be valuable to the State, and which could be readily disposed of, the Legislature of 1860, and by an amendment of that Act by the session of 1862, provided for securing possessory and pre-emptory rights to actual settlers. In accordance with the provisions of those Acts, and the natural desire on their part to acquire a title at the earliest moment, and having reason to believe that they could sooner obtain title from the State than from the General Government, a large number of settlers who had taken the preliminary steps to secure title from the general government, filed a relinquishment to the United States, for the purpose of enabling the State to locate such lands. Their applications to purchase the same being at once filed with the Governor as provided by law, how they have been disappointed is well known to all who are familiar with the condition of land matters in Eastern Oregon, as much of the land at that time applied for has not yet been approved by the Commissioner of the General Land Office; but we have reason to believe will be soon. A large number of applications to purchase these lands have been made under existing laws at time of their filing, for the purpose of harvesting a crop of hay, and only as a temporary home, and subsequently abandoned, and the present location of the claimants unknown. We have received some applications to purchase such abandoned claims, where the parties desirous of purchasing could not procure a relinquishment to the State, or satisfactory evidence that they were successors in interest to the original claimants, and to meet such cases the Board appointed and authorized Hon. D. Chaplin, Receiver of the Land Office at La Grande to act as agent of the Board at that place to receive evidence in relation to the abandonment or relinquishment of claims

Digitized by Google

on State lands, with instructions to be governed by the rules of the General Land Office in such cases, which he generously proffered doing without expense to the State. From the distance at which those lands are located from the capital, and the delay necessarily unavoidable in the transaction of business, and in view of the large amount of funds involved—as well as the convenience of actual settlers—we would suggest that enlarged powers be given the Board to appoint an agent to reside at La Grande with a fixed compensation, to give his entire attention to the interests of the State in this regard.

Digitized by Google

AGRICULTURAL COLLEGE LANDS.

By Act of Congress of July 2, 1862, the State was granted ninety thousand acres of land for the use of a "College for the benefit of agriculture and the mechanic arts"; a provision is made in the Act referred to that should the State neglect or fail to provide such college within five years, the grant should cease. The State accepted the grant, with all its conditions and obligations, by Act approved October 9th, 1862. By Act of Congress approved July 23d, 1866, five years' extension of time was given the State to erect the college, and as the time of that extension will have nearly elapsed at the next session of the Legislature, your attention is called to the matter thus early. None of the land has been yet located.

No land for public buildings, or salt springs, has been located, and the Board have no information that any "swamp and overflowed lands" have been reported as such by the Commissioner of the General Land Office.

Very respectfully,

GEO. L. WOODS,
E. N. COOKE,
S. E. MAY,
} Commissioners.

REPORT.

The Joint Committee appointed to examine the books and accounts of the State Treasurer and Secretary of State would submit—

That, by virtue of the power and authority with which your Committee was invested, they procured the services of Mr. M. K. Lauden, an experienced accountant and one of the proprietors of the National Commercial College of Portland, to assist them in the examination of the books and accounts of the officers above named.

Mr. Lauden appeared before your Committee on the 26th of September, and being placed under oath to make a true and faithful investigation of the book accounts and vouchers of the officers above named, and having been fully authorized and instructed by the Committee, he was assigned to duty in the office of the State Treasurer.

The report of Mr. Lauden embraces the result of his examination, and it is herewith embodied and made part of this report, in order that this body and the public at large may know as to the fact in the premises:

REPORT OF M. K. LAUDEN

TO THE

Joint Committee of the Legislative Assembly,

TO

INVESTIGATE BOOKS AND ACCOUNTS

OF THE

STATE TREASURER.

Digitized by Google

Digitized by Google

REPORT.

In accordance with instructions from the Joint Committee, appointed by the Legislative Assembly to investigate the books and accounts of the State Treasurer, having been first placed under oath by said Committee to make a true and faithful examination, would report that I entered upon the examination of the books and accounts of the State Treasurer on September 28th, and continued my labors in the examination of all matters relating to the business of that office for twenty-two consecutive days.

RECEIPTS.

I commenced my examination by comparing the receipts of the Treasury, as reported by the State Treasurer, with the original entries in the cash-book and ledger, and the duplicate receipts of the Treasurer on file and on record in the Secretary of State's office, as well as the printed report. I went through all the additions and extensions, and find that the Treasurer has received, during the fiscal years of 1867 and 1868, including balances on hand at last report, the sum of three hundred and ninety-seven thousand five hundred and forty-five one-hundredths dollars ($397,500 45-100), which agrees with his report to the Legislative Assembly.

DISBURSEMENTS.

After the examination of the receipts as above set forth,

Digitized by Google

I proceeded to examine the warrants or vouchers paid by the State Treasurer from the several appropriations, as made by law. I examined and carefully compared each warrant paid with the ledger accounts, as well as with the printed report. I found all the warrants properly entered and charged against the several funds upon which they were drawn—in separate packages, and arranged in the packages in the same order as they appear on the ledger and in the printed report.

I went over all the additions with care, and as the result of my examination of Secretary of State's warrants, paid by the Treasurer, find that the following disbursements have been made, as follows:

From General Fund	$ 24,500 26
" Penitentiary Fund	40,000 07
" Penitentiary Building Fund	7,136 19
" Incidental Fund	8,266 22
" Executive Fund	10,609 16
" Judicial Fund	25,040 86
" Insane and Idiotic Fund	86,000 00
" Convict Fund	9,000 00
" Legislative Fund	16,030 07
" Printing Fund	10,000 00
" Military Tax Fund	2,373 00
" Common School Fund—coin	66 00
" " " " currency	4,277 10
" Escheat Fund	1,700 00
Making the total amount paid out upon the Secretary of State's warrants the sum of two hundred and forty-four thousand nine hundred and ninety-eight and ninety-three one-hundredths dollars	$244,998 93

Digitized by Google

STATE BOUNTY BONDS.

INTEREST AND REDEMPTION THEREOF.

The examination of this department occupied a large proportion of my time, notwithstanding everything pertaining thereto was in order and well arranged for examination. I commenced my examination by comparing the books of the Adjutant General with the record of the State Treasurer, giving the number of the bond, to whom issued, date of issue, and the amount of bond; and finding the records agreeing, I took up the warrants drawn by the Secretary of State upon the certificate of the Adjutant General, and upon which the Treasurer has delivered the bounty bonds. I found these in order, all carefully arranged in consecutive numbers, excepting for such bonds as are still in the hands of the Treasurer ready for delivery, upon presentation of proper warrants therefor.

Having gone through with the entire issue (2,755 bonds), and having examined the pay rolls, and being satisfied as to their correctness, I proceeded to examine and investigate the coupons (paid by the Treasurer from February 25th, 1866, to September 5th, 1868, both days inclusive) upon this series of bonds. The coupons, as presented to me by the Treasurer, were in packages neatly put up and endorsed on the wrapper the number of coupons which each package contained, and the value thereof in dollars and cents. These packages contained from twenty-five to fifty, and in a few instances one hundred each, of the value of one dollar and seventy-five cents each coupon. They were all carefully cancelled by punching, and thus disfiguring the face thereof. I examined these coupons with great care, counted and recounted each package, compared

Digitized by Google

them with the entries and postings to the ledger, also with the printed report of the Treasurer, and find as follows:

That the State Treasurer has redeemed and paid two thousand six hundred and thirty-three coupons, of the value of one dollar and seventy-five cents each, from February 25th, 1866, to September 3d, 1866 (and which were examined by a former committee and not included in the disbursements made during the years of 1867 and 1868), amounting to four thousand six hundred and seven and seventy-five one-hundredths dollars ($4,607.75)—making a difference of the amount reported to the Legislative Assembly in 1866 of one dollar in favor of the State Treasurer.

From September 3d, 1866, to September 5th, 1868, the period embraced in the report now under examination. there has been paid the number of nine thousand six hundred and fifty-three full coupons, of the value of one dollar and seventy-five cents each; also three hundred and twelve fractional coupons, being interest for two months and twenty days, which together in the aggregate amount to seventeen thousand one hundred and thirty-four and seventy one-hundredths dollars ($17,134 70)—making a difference between the amount actually disbursed and the amount reported by the State Treasurer of fifty cents in his favor.

These coupons, after examination and going through with all the entries, additions and extensions, were placed in one package, excepting the fractional coupons above mentioned, which still remain on the redeemed bonds of date of March 20th, 1868. The package contains twelve thousand two hundred and eighty-six coupons, and is sealed with wax, and a certificate placed on the wrapper showing the value, the examination and its correctness.

My next labor was devoted to the examination of can-

Digitized by Google

celled bounty bonds, which have been redeemed from time to time in pursuance of law.

These bonds have all been duly registered according to Act of 1866, providing for their registration; and the record shows the number of the bond, to whom issued, date of bond, amount of bond, date of redemption, and the amount paid therefor; and the whole amount carefully added, each redemption separate, and carried forward correctly.

These bonds were carefully examined, one by one, and compared with the "register of redeemed bonds." I found all the coupons which would become due subsequent to the date of their redemption still attached to the bonds, and each and every coupon, together with the bond itself, all carefully cancelled by punching.

Three redemptions have been made, as follows:

September 5th, 1866; March 20th, 1868, and August 1st, 1868.

I have examined all the bids made under each advertisement for redemption, and find that the bids have been opened in presence of the Secretary of State, and that the amount paid at each redemption was in accordance with the bids on file, duly certified under the seal of State.

On September 15th, 1866, four hundred and seven bonds were redeemed for fourteen thousand, nine hundred and ninety-one dollars ($14,991.00).

On March 20th, 1868, three hundred and twelve bonds were redeemed for fourteen thousand nine hundred and ninety-four dollars ($14,994.00); and on August 1st, 1868, two hundred and seventy-three bonds were redeemed for thirteen thousand six hundred and fifty dollars ($13,650 00-100)—making the total number of bonds redeemed

Digitized by Google

nine hundred and ninety-two, of the value of forty-nine thousand six hundred dollars ($49,600.00), and the amount paid for their redemption by the Treasurer is forty-three thousand six hundred and thirty-five dollars ($43,635.00), which agrees with the report of the State Treasurer, as submitted to the Legislative Assembly.

RELIEF BONDS.

INTEREST AND REDEMPTION THEREOF.

There has been but one redemption of this class of bonds, which was made on March 20th, 1868; at which time seventy-eight bonds of various denominations were redeemed, of the aggregate value of eleven thousand three hundred and ninety-five dollars ($11,395.00), and which were redeemed for the sum of ten thousand two hundred and fifty-five and fifty one-hundredths dollars ($10,255.50); and which is correct, as reported to Legislature.

I have also examined the bids made for surrender, and find that the bonds were redeemed in accordance with the lowest bid on file.

The same cancellation was made of the coupons and bonds as in the case of the bounty bonds, and all the coupons still attached to the bonds, except those which became due prior to their redemption.

The coupons for interest, of this class of bonds, are different from those on the bounty bonds, varying from forty-seven cents to six dollars and thirty cents. These coupons were done up in a packages the same as those of the bounty bonds, with a memorandum enclosed in each package, stating the number of coupons, the amount of each one, and the amount of the sum total.

Digitized by Google

As the result of my examination, I find that, from February 25th, 1866, to September 3d, 1866, the State Treasurer has paid seven hundred and one coupons, amounting to five thousand six hundred and twenty-nine and eighteen one-hundredths dollars ($5,629.18)—making a difference between the books and printed report of four dollars and forty-five cents against the State Treasurer.

From September 3d, 1866, to September 5th, 1868, both days inclusive, the Treasurer has paid two thousand one hundred and sixty-three (2,163) coupons, amounting in the aggregate to twelve thousand six hundred and forty-seven and fourteen one-hundredths dollars ($12,647 14), together with the additional sum of one hundred and seventy-six and seventy-four one-hundredths dollars for fractional coupons, which are still attached to the bonds redeemed March 20th, 1868;—making the sum total paid in interest on relief bonds from September 3d, 1866, to September 5th, 1868, twelve thousand eight hundred and twenty-three and eighty-eight one-hundredths dollars ($12,823 88)—making a difference between the amount actually paid, as per vouchers, and the amount reported to Legislative Assembly of eight dollars and thirty-nine cents in favor of the State Treasurer.

SCHOOL AND UNIVERSITY FUNDS.

LOANED.

The examination of all securities in the hands of the Treasurer for monies loaned from both of these funds were examined and passed upon, in person, by a full committee, my examination extending only to amounts and correctness of the account, as reported to the Legislative Assembly.

Digitized by Google

I find that the Treasurer has loaned, by and with the advice and consent of the School Land Commissioners, from the common school fund, in U. S. currency, the sum of twenty-two thousand and eighty-six and thirty-five one-hundredths dollars ($22,086 35); and in U. S. coin the further sum of two thousand seven hundred and forty-four and twenty-two one-hundredths dollars ($2,744 22)—making a total sum loaned in currency and coin, twenty-four thousand eight hundred and thirty and fifty-seven one-hundredths dollars ($24,830 57.)

And that the State Treasurer has also loaned from the university fund, with the consent and the approval of the Board, in U. S. currency, the sum of one thousand six hundred dollars ($1,600), and in U. S. coin the further sum of one thousand three hundred and eighty-five dollars ($1,385.00)—making a total sum loaned from the university fund, in currency and coin, of two thousand nine hundred and eighty-five dollars ($2,985.00).

RECAPITULATION.

The following condensed statement will appear by examination of the foregoing as the result of my examination:

The Treasurer has received from all sources, including balances of former report,	$397,500 45
The Treasurer has paid out upon the Secretary's warrants	$244,998 93
Interest Coupons, Bounty Bonds	17,134 70
Bounty Bonds—redeemed	43,635 00
Interest Coupons, Relief Bonds	12,823 88
Relief Bonds—redeemed	10,255 50
Common School Fund—loaned	24,830 57

Digitized by Google

University Fund—loaned	2,985 00
Discount on Legal Tenders sold	461 91
Total paid out	$357,125 48
Leaving a balance in the Treasurer's hands, due State, of	$40,374 97

Making a difference between the amount reported to the Legislative Assembly and the amount found actually due amounting to eight dollars and eighty-nine cents ($8 89) in favor of the State Treasurer.

In the Relief Bond Coupons paid from February 25, 1866, to September 3, 1866, which period was included in the report of 1866, there is a difference of four dollars and forty-five cents ($4 45) against the Treasurer. Also, for the same period, there is a difference in the Bounty Bond Coupons paid, from the report of 1866, of one dollar in favor of the State Treasurer. Making a difference, on the whole, of Five dollars and forty-four cents ($5 44) in favor of the State Treasurer.

Thus making the actual balance on hand ($40,378 42) forty thousand, three hundred, seventy-eight and forty-two one-hundredths dollars, instead of $40,383 86 as reported by the State Treasurer.

KEEPING OF THE BOOKS.

The records of the transactions of the Treasury Department I have found full and complete, the system of keeping the accounts well adapted to the business, and the entries are all so plain and definite on the face that there is no difficulty in tracing each account and proving its correctness by the vouchers on file. The books and records of the office are kept in a systematic manner and with

Digitized by Google

great neatness. The Treasurer is entitled to thanks for the great pains he has taken to so arrange the vouchers that the accounts could be examined with rapidity and at the same time thoroughly.

October 19th, 1868.

M. K. LAUDEN.

Your Committee examined in person all the securities held by the State Treasurer for School and University funds loaned, and are of the unanimous opinion that the securities are ample, and that great pains have been taken in loaning these funds. In addition to the customary first mortgages usually taken, collaterals are also taken in shape of Insurance Policies on perishable property, payable in gold coin, thus making the securities doubly sure.

Your Committee also examined and carefully counted the cash remaining in the hands of the Treasurer (coin and currency) and found it agreeing in amount with the report of Mr. Lauden.

Your Committee would further add that this is the fourth investigation made in the Treasury Department, during the official term of the present incumbent, and your Committee can only add their testimony to that of former committees, in expressing their belief that the business and duties of the Treasurer have been faithfully and honestly discharged.

Your Committee also submit the report of the Account-

Digitized by Google

ant on the examination of Secretary's books and accounts, which will give in detail the onerous duties performed by that officer.

In conclusion, your Committee would submit these reports of Mr. Lauden for the consideration of this Legislative Assembly and the people of Oregon.

Respectfully submitted,

R. B. COCHRAN, Chairman,
H. C. HUSTON,
S. C. ADAMS,
Senate Committee.

T. W. DAVENPORT, Chairman,
W. F. ALEXANDER,
T. A. DAVIS,
House Committee.

Senate Chamber, October 24, 1868.

Owing to the fact that the fiscal year ends at so late a day, the Secretary of State is, and was unable to furnish his printed Report in sufficient time for as careful and thorough an examination as was necessary to enable your Committee to report all the details of the business of his office, and [they] would herewith submit the report of Mr. M. K. Lauden, and recommend that the examination be continued by a future Legislature.

R. B. COCHRAN, Chairman,
H. C. HUSTON,
S. C. ADAMS,
Senate Committee.

T. W. DAVENPORT, Chairman,
W. F. ALEXANDER,
T. A. DAVIS,
House Committee.

REPORT OF M. K. LAUDEN

ON BOOKS AND ACCOUNTS OF

THE SECRETARY OF STATE.

To the Joint Committee of Legislative Assembly to examine the Books, Accounts and Business of the State Treasurer and Secretary of State:

Having been appointed and duly authorized to examine the Books, Vouchers and Business pertaining to the office of Secretary of State, would respectfully submit:

That after a thorough investigation of the matters pertaining to the Department of State, I have been unable to discover any errors or discrepancies, and find full and complete vouchers on file for all warrants drawn on the Treasurer. The books and records are kept in a systematic manner. and with great care and neatness.

The printed Report of the Secretary, as presented to the Legislative Assembly, contains a new feature, that of stating the nature of the claim on account of which the warrants were issued. On account of the manner in which this extension had to be done in preparing it for the printer and the late issuance of the report, no time was left to correct the proof, hence there are some errors in the extension of the nature of the claim, on account of which errors the expense in some directions appear unnecessarily large, but upon full investigation I find, however, that this is not the case, especially not in amounts paid out of the Incidental Fund. Otherwise, I find the Secretary's Report true and correct.

The business of the office is extensive, and continually

Digitized by Google

increasing. By a provision of the Constitution, he is not only required to act in the capacity of what is usually regarded as the duty of Secretary of State, but he is also required to act as Auditor for the State, and superintend many things which, in the aggregate, consume much time.

For his politeness and accommodating manner in regard to the examination of the Vouchers, Books and Records, he deserves the thanks of the Committee.

October 24, 1868.

M. K. LAUDEN.

REPORT.

SALEM, September 1, 1868.

To HON. GEORGE L. WOODS,
GOVERNOR OF THE STATE OF OREGON:

SIR—To your Excellency and the Honorable Legislative Assembly of the Commonwealth of Oregon, permit me to submit the following detailed report of the condition, works, expenditures, etc., of the State Penitentiary, commencing on the 14th day of September, 1866, and closing with the date abo v.

The condition of the Institution at the time your Excellency entrusted the management of it to the present Superintendent, is too well known to be enlarged upon at this time, and as such, it only requires an occasional reference to in making up this report.

The expenditures for the conduct of the prison, to casual observers, will seem to be immense, and not in proportion to the income; but by comparison, you, as the judges, will be able to decide whether the results justify the outlay.

At the time of entering upon the duty assigned me, it was a totally new field of labor, and one which I had never contemplated, excepting, as other citizens from a distance; and when brought into immediate contact therewith, realized that fine spun theories upon the control of convicts and the utilizing of their labor sufficiently to make them pay the annual expenditures made on their behalf, was one branch of the subject, and the actual proceeding was another.

From the surrounding circumstances connected with your State Prison, when entering upon the Superintendency thereof,

Digitized by Google

the officer in charge has had opportunities to be taught experience that no other one occupying the same position will have for years to come; probably never again. And as a public servant, I deem it my duty to return to you in this report such matters as may hereafter be beneficial in the conduct of the prison, and that those who follow may improve upon them until your States Prison ranks second to none within the United States.

As you will perceive from the tabular returns made, there has been no escapes for the past two years, the cause for which is, that all instructions to subordinate officers from this office were—that the safe keeping of the prisoners should be considered first, after which other objects could be attained. That the public had suffered much, and had at great expense arrested and convicted these men, and entrusted them to us for safe keeping, it therefore became our duty as faithful servitors *to hold them at all hazards.* It required considerable time and many changes of officers to impress permanently the fact upon those interested that any want of vigilance on their part carried with it *dismissal from service.*

1. CONDITION OF CONVICTS. 2. LABOR. 3. VOUCHERS. 4. INCREASE OF PRISONERS. 5. DISCHARGES.

1. The condition of the convicts in respect of ability for daily labor, discipline and health, at this time, bear no comparison to the condition of those received less than two years since. At that time, there was received from the former Superintendent a small disorganized mob of reckless men—dangerous to come in contact with—wretched and degraded from continual punishment being inflicted without having it tempered with justice—insolent from hunger, and driven to despair by disease, which held them more surely as prisoners than the guards placed over them.

Under such circumstances, compensatory labor was ex-

Digitized by Google

pected and demanded of the convicts. Knowing this, my first efforts were directed toward building up my laborers and reducing them, through discipline, into an organized body. The next was to see that they had proper tools to work with, and that their labor was intelligently directed; all of which required time to do, but by perseverance it was accomplished.

2. The labor performed has been of such variety as was required to perfect the building at this time occupied as the prison, officers' quarters, work shops, stockades, fences, clearing and grubbing the land, etc., etc., but our specialty for summer work has been and continues to be the making of bricks, which subject I propose to again to refer to under the head of improvements.

3. The sum total for which Penitentiary Vouchers have been issued, appear in regular order; after which, the various items have been placed in mass to generalize and assist investigation.

4. Upon examination, the tables will show a fearful increase of prisoners during the past two years, something that was totally unlooked for either by the last Legislature or the present officers, and not at all contemplated by the architect of the house at this time occupied as a prison. Should there be a continuation of the increase, another year will more than fill the cells; and as it is, the house is overcrowded.

5. Since the commencement of this administration, there has been forty-six persons discharged. Of that number, nine have been pardoned by the Governor, and one by acting Governor May, and one died. All of the others have received at least a portion of the time accredited to them by merit marks, which by law necessarily carries with it a pardon, there being but one exception—that one was absent only forty days (thirty of which was spent in jail) when he returned for another term.

Digitized by Google

1. OFFICERS. 2. GUARDS.

1. You will perceive, by reference, that the corps of prison officers has been increased by the addition of a third warden, commissary and teamster, and chief of culinary department. Each officer in his department I found to be actually necessary for the safe keeping of the prisoners, economical distribution of the provisions furnished, and an insurance that after being taken to the kitchen, proper use would be made of the property so assigned. Instead of being an expense to the State, I must say that since my adoption of the system of controlling each department by a special officer, extravagance has given way to economy, filth to cleanliness, and the saving of provisions from the first day of the inauguration of the plan up to the present, has more than doubled the salaries paid.

2. Having a larger area to guard this year than formerly, I introduced the supernumerary system. The supernumerary officers are placed upon half salaries, and while they learn the business, their promotion is assured upon a vacancy occurring in the regular line. Otherwise, should they prove to be unfit for the occupation, after trial, as supernumeraries, they are discharged.

I find, by observation, that the proportion of men fit for the occupation of guarding convicts, is about one to fifteen. Strange as the assertion may seem to those who have never been connected with an institution of this kind, it is nevertheless a fact. The continual strain upon their vigilance either wears them out, so much so that they retire voluntarily, or they become careless and have to be removed.

Another peculiarity is, that guards, without having any communication at all with the prisoners, will become sympathetic toward individuals, and from that moment their usefulness as guards is destroyed, and the officers in immediate

Digitized by Google

contact with the convicts jeopardized. In many such cases, where the disease was not considered incurable, the plan of leave of absence for a short time, to recuperate, has been adopted, otherwise discharge.

1. NIGHT GUARDS. 2. HOSPITAL. 3. PRISON SCHOOL.
4. PATENT SHACKLE. 5. CLOTHING FOR DISCHARGED MEN.

1. The premises being constructed wholly of inflamable material, I have greatly feared fire, either accidental or what might be done by an over-vicious convict as a last means of escape. For the reason above, at considerable expense, water has been put through the house, and fire hose are always in readiness. The night patrol system has also been adopted. To be more explicit, after the prisoners are turned over to the night guards by the wardens, they are required to carefully examine the inner prison as often as necessary, but not less than once each hour during the night; furthermore, the night lamps are not permitted to burn but a stated time before removal to be cooled and re-trimmed.

2. It is to be presumed that the designer of the building did not expect such addition to the number of convicts as have been received during the past two years, for the reason that no arrangement was made for a hospital. Such empty cells in the lower tier—dining-room side—of the building, as we can keep clear, are used for the purpose named, because we can keep it better ventillated and clear from the mass of convicts, none being permitted on that side of the building but the house hands, except at meals, school, and when they retire for the night.

3. Every evening, after supper, the room having been cleared, *school* call is made. All of the young men are required to attend—with the older ones it is optionary. Those who belong to the classes are lined up and marched into the

Digitized by Google

room, where for one hour they are taught the various branches of the common schools, by the better educated of their fellow prisoners, several of whom are fully capable of advancing their scholars in the desired path.

4. The last Legislative Assembly made an appropriation for the purchase of the State right for the patent shackle, which was not done for cause. The owner of the patent sued, recovered and restrained the State from the use of the shackle. Not feeling at liberty to cripple my own efforts to hold the convicts and labor them, by and with the consent of the Governor, I leased the privilege of use.

5. Many of the men who have been discharged during the past two years were comparatively naked on the day of discharge. There could be no question about their having had more or less clothing when they were brought to the prison. When they went out, *their clothing*, which the *law* instructs and requires the officers to have care for, could not be found. The wilful neglect of those who should have cared for the convicts' property, has been a considerable bill of expense to this administration, and it became my duty to replace their lost property, not only as a matter of justice, but to sustain any self-made resolution of reform made by the discharged men.

1. PUNISHMENTS. 2. FIGHTING AMONG CONVICTS. 3. NEW PRISONERS. 4. MERIT MARKS.

1. All of the old modes of punishment having been prohibited, means had to be invented to insure discipline; and punishment for refractory prisoners is graded, as follows:

The first offence, is followed by a lecture from the officer in immediate charge of the prisoner—if the offence is committed while upon the works; if in the building, by the officer in charge.

Digitized by Google

The second offence is reported to the warden, whose duty it is to admonish the culprit.

The third offence carries with it a shackle; if the prisoner has one on, a second one, and the loss of his merit marks for the week.

The fourth offence sends the report up to the Superintendent, who, in most cases, gives the offending one bread and water from one day to ten in the solitary.

Flogging is a last resort, and then *only* when the prisoner has broken every rule of discipline, or committed an outrage upon a fellow prisoner of such nature that he places himself without the pale of mercy.

2. Fighting among the convicts was no unusual occurrence when I entered upon the duty of Superintendent, and was never effectually stopped until the guard nearest the combatants fired on them, as per instructions from this office.

3. A number of prisoners, during the past two years, have entered the prison with the idea that they could "run the institution," *bluff the officers, or leave when they were inclined.* With such men, an immediate war for the supremacy commenced, and without being specially severe toward them, they generally succumbed as they became "prison-wise," but in some instances rough methods had to be applied.

4. The merit-mark law, as it now stands on the statute book, should receive the approbation of every generous man, as it is the means of giving to suffering humanity hope for better days.

From a critical examination of the book of merits, I have been led to believe that my predecessor construed the law against the recipients of merit, or that the general behavior of the convicts he was in charge of—a portion of whom are still there—were much worse than those at this time in the prison.

Digitized by Google

Nevertheless it is a good law, and a source of great benefit to the outgoing prisoner.

1. MORALS. 2. PHYSICIAN AND SURGEON. 3. COST OF OFFICERS AND CONVICTS' FOOD.

1. Morals are taught on the first day of each week, by reverend gentlemen who volunteer their services, whose report is is hereto annexed.

2. Dr. H. Carpenter had charge of the sick of the institution at the time of my being appointed, and has remained in charge up to date. For particulars, permit me to refer you to special report attached hereto.

3. The expense per diem for the convict's food, the first seven months, was at the rate of twenty-two cents per day; for the officer's, forty cents per day, under the old system of management.

During the month of April, 1867, the system was revolutionized; and from that time the expense per day, up to June 1, 1868, per convict, was sixteen cents and three mills; for officers, twenty-three cents and eight mills.

Since the date last referred to, the prison garden has furnished a large amount of the supplies necessary, and from that time and hereafter we can count upon a material decrease in table expenses. What it will aggregate in cash at this time cannot be computed, as the crops and stock are still advancing toward maturity.

RECOMMENDATIONS.

1. MACHINERY FOR PRISON. 2. REMOVAL OF DINING AND KITCHEN DEPARTMENTS. 3. PROVISIONING OFFICERS. 4. PRISONERS CLOTHING. 5. SOLITARY CONFINEMENT.

1. Under this head, permit me to suggest the considera-

Digitized by Google

tion of supplying the institution with such machinery as would make the winter work of the convicts tend toward the creating of cash income.

One or two more winters can be used in enhancing the value of the State property, after which that branch of work will cease. In the meantime, during the summer months, the labor can be so directed, if desirable, that it can be used to great advantage furnishing material, and, if so ordered, building State houses at any point it may please the Legislature.

2. I would further ask that the Building Committee be empowered to withdraw the present dining and kitchen departments from the main building into a separate apartment. The reason for such request is: the kitchen being in the west end of the building, near the chief entrance, the draft of air sweeps the various steams down through the gratings, among the sick and well alike, and herded together as they are, with every window and door thrown open, it is often midnight before the house is cleared of the stifling smell so created.

3. I would further recommend that action be taken upon the subject of provisioning the officers. The old system of the Superintendent catering for the officers is still adhered to, for the reason that I did not feel at liberty to undertake the reform.

There are many objections to the mode now in operation. The principal ones are, that it requires the time of a convict to cook for the officers, and another to wait upon and keep their table material in good order. That is putting convict labor into the wrong channel, and it places the whole corps of officers at the mercy of the convicts. It is extremely dangerous, is an intolerable nuisance, and should be abated.

Before I put an overseer of kitchen on duty, the provisions furnished for officers by some mysterious process invariably disappeared, and the officers' living was graded below the

Digitized by Google

convicts'. I have no knowledge of the conduct of officers' messes in other prisons, but if conducted upon the same plan as this one, let Oregon be the first to introduce the reform.

It is necessary that the officers should sleep in or near the main prison, but their board should be commuted to them, a mess house erected upon the State grounds, and their provisions furnished therein. By that means, the safety of the officers would be assured, and no provisions, excepting such as would be for the use of convicts, permitted within the walls of the prison. The purchases to be made by the Superintendent would be cut down in proportion, and a certainty arise therefrom that everything so purchased would be properly used.

4. The clothing of the convicts now in use has not been returned in the invoice, for the reason that we have been running it down purposely, as it is not sufficiently strong. The quality of the cloth was good of the kind, but after mature deliberation I have come to the conclusion that some other kind of cloth would be cheaper for the State, if adopted.

In this prison, underclothing is unknown, unless ordered by the physician for isolated cases. In nearly all other prisons from which reports have been received, regular returns of underclothing are made. Such being the facts, I would propose that some other kind of good, strong cloth be introduced. For the sake of economy, the striped cloth for coats and pants might be laid aside—the striped shirt introduced under this administration continued. When men work, it is with their coats off, and it is from the belt up that they should be magnified; that, the striped shirt does effectually. So far as the balance of the dress is concerned, it is of no moment what the color may be, provided it is not black.

As for the clothing having anything to do with keeping prisoners from attempting to escape, it is simply absurd.

Digitized by Google

Nothing but iron and rifles hold convicts, and they combined often fail. As a badge of disgrace, it probably answers the purpose, and may be an incentive to continue their unlawful acts after discharge. Upon the whole, it matters nothing to the public, excepting that it is not economical clothing.

5. Permit me to further suggest that a system of solitary confinement, similar to the Michigan law, would be beneficial, and strengthen the discipline of the institution. The cause for the proposition is, that where the officers know a man to be particularly dangerous, rather than resort to anything that might be misconstrued, they take desperate chances with the prisoner.

To illustrate: On the 23d day of July, during the afternoon, a conspiracy was formed in and around the brick machine and works to attempt to force the stockade. The plan was concocted by one Patrick Brown, a murderer from Umatilla county, whose sentence had been commuted from death to imprisonment for life. This murderer by profession insisted upon cutting down Mr. E. R. Barry and myself, when we returned from the lower yard, where we had gone to examine some work to be completed. Several agreed to the proposition; but one, Marshal, from Union county, refused to engage in the break, unless the killing part was dispensed with. Brown and three others would not consent; whereupon Marshal by some means informed a convict on the front of the yard of their intentions, who, about the time I left the works, notified Mr. Barry that he was in danger. Suffice it to say that, by keeping out of the immediate reach of the convicts, the proposed attempt was a failure.

This Brown, a reputed Florida-reef pirate, a dangerous desperado, had to be continued upon the works, simply for want of a law authorizing solitary confinement. The second attempt, which was to have come off a few evenings after the first one, caused me to order several into double shackles;

Digitized by Google

whereupon one of them voluntarily *confessed* and *conf*
the report we had received from another source.

This is the second time within two years that convicts
saved the lives of their officers—one at the time of the
of the 27th of August, 1866, and this last intended one
23d of July. It is true that on each occasion life has
preserved by men sent for long terms. Nevertheless, I
respectfully request your Excellency and the honorable
islature, that while you consider the subject of solitary
finement, at the same time you consider the propriety o
quate rewards for such services as the foregoing represe

IMPROVEMENTS.

Under this head permit me to say, that the introduct
as simple an article as the brick machine has totally r
tionized the slow and laborious method of labor first in
the prison; and so completely did we master the int
business of brick-making in one season, that during thi
there has been no mechanics necessary. Viewed fro
economical stand-point, it is more than a success. Las
we were under the necessity of having a foreman for
making and a *setter*, whose combined salaries and boa
penses were $220 00 per month. During last year, th
chines' work was a saving to the State of at least three
dred dollars per month during the season; this year, by
convict labor in every department, the combined sav
over five hundred dollars per month.

Next year, if required, there can be a force of pa
skilled, with some perfect workmen, placed upon any
ordered or desired built.

FINANCE.

The financial condition of the Penitentiary is not as

Digitized by Google

as I had hoped to have been able to make it. Nevertheless, everything considered, it is in a superior condition to what ordinarily might have been looked for. Thrown upon my own resources to furnish labor, and that which would be compensatory, to repay to the State treasury so much of the liberal allowance made for the maintenance of the institution as I could, was fearful to contemplate, as from time to time the drain upon the fund was made. And it is with pleasure that I refer you to Abstract A, wherein you will please notice that the whole amount brought forward is for brick sold—excepting fourteen hundred dollars from sale of saddle-trees—which alone nearly pays fifty cents on the dollar of the *total* expenditures for the past two years, leaving the personal property amassed, the labor done upon the State buildings and grounds, and the coming crops to pay the remaining fifty cents, which they will more than do. All of which proves satisfactorily that, within a few years, the institution *can be made self-supporting*—that, instead of being a continuous burden, convict labor *can* be made to return State revenue, other than their own expenses.

REPORTS.

PHYSICIAN AND SURGEON'S REPORT.

SALEM, OREGON, August 31st, 1868.

MAJ. M. P. BERRY,

SUPT. OREGON STATE PENITENTIARY:

SIR—I have the honor to submit the subjoined report of the sanitary condition of the convicts in the State Penitentiary, since my appointment as physician and surgeon for that institution, dating from the arrival of the convicts at this place:

The diseases which I have treated among the convicts since assuming the duties assigned me, may be classed as follows:

Syphilis, in its various forms; Rheumatism; Gonorrhœa; acute and chronic Gleet; Stricture of Urethea; Dysentery; Diarrhœa; Fever, Intermitten and Remitten; Cholera Morbus; Peretonites; Chronic Gastritis; one case of phthisis, which resulted in death; one case of poison, which also terminated fatally. Both of the last named cases were far advanced when I was first called upon to treat them, the case of phthisis having had its inception while the convicts were in charge of the former Superintendent at Portland. The case of poison occurred while a prisoner in the Portland jail.

During the first two quarters there was a great number of cases of Diarrhœa, Dysentery and Intermittent Fever. There were, also, several cases of Catarrh, and some cases of Scorbutus during the same period. The prevalence of acute disease at that time was, doubtless, incident to the exposure suffered by convicts during their removal from Portland.

Digitized by Google

The inclemency of the weather and dampness of the buildings occupied after their removal here, were, also, causes which contributed to impair the health of many of the convicts; also, the want of a proper vegetable diet.

After the inauguration of the present system of strictly observing a well regulated diet, and employing the convicts at labor during regular hours of the day, without overtaxing their physical power, there has been and, in my judgement, will continue to be a gradual decrease of the more acute forms of disease.

Diseases of a chronic character predominate among the convicts. The reasons are obvious. The class of men who are so unfortunate as to become inmates of prisons are generally those whose habits have been noted for irregularity; hence a larger proportion, when immured, have impaired constitutions, from the effects of intemperance, syphilis, onanism, or from having received some mechanical injury. And many of those now confined in our State Prison have been rendered invalids for life from some of these causes, and there are always cases among the number so afflicted that require daily medical attention.

With a view of economy to the State, in the expenses of procuring medical attendance for the prisoners, I deemed it my duty to instruct the Warden in the treatment of some ordinary affections and special cases requiring close and frequent attention. And for this purpose, after consultation, it was thought advisable to procure some standard medical works for the use of the Warden, that he might be more fully qualified himself for the intelligent discharge of such duties.

Daily visits by the physician of the prison are thus obviated, except in severe and dangerous cases; but the additional duties imposed upon the Warden render the requirements upon that officer, at times, onerous.

In view of these facts, I have deemed it proper to make the

Digitized by Google

following suggestions, which, together with the foregoing report, are respectfully submitted:

Under the present plan of observing strictly a well regulated diet and perfect cleanliness, there is no separate apartment for the sick. This not only renders the treatment of those affected with diseases less likely to effect a cure of their maladies suffered, but it is also injurious to the well, who are, of necessity, compelled to inhale the impure air of the sick.

This can only be obviated by the erection of a hospital building apart from the main prison. The expense of the construction of such a structure, as a ward for the sick, would in a few years be saved to the State by the decrease of sickness among the prisoners, and the consequent retrenchment of the sanitary expenses of the prison and saving of the convicts' labor. A competent hospital steward should be employed to take charge of the sick, and to have the general supervision of the hospital. He should be qualified to prescribe temporarily, in the absence of the attending physician, and required to treat the unfortunate patient placed under his care humanely and according to directions. It should, also, be made part of his duty to examine the convicts each morning, before commencing their days' labor. He would thus be able to determine the condition of those complaining, and decide whether any were merely feigning sickness for the purpose of avoiding work. The want of a hospital building is imperatively urged, both by the dictates of humanity and the material interest of the State, and the service of a hospital steward will be required until such time as the State Legislature shall deem it neecssary to appoint a resident physician for the Penitentiary.

Very respectfully,

H. CARPENTER,

Physician O. S. Penitentiary.

REPORTS OF CHAPLAINS.

SALEM, August 26th, 1868.

M. P. BERRY,

SUPERINTENDENT STATE PENITENTIARY:

SIR--Since the commencement of your official duties, as Superintendent of the State Penitentiary. I have, in my capacity of minister, visited the Prison as often as my other duties would permit, and for the courtesies received from the officers at such times in charge, accept my acknowledgements.

The great interest manifested by the convicts in the moral instructions I have given them, satisfies me that even those hardened men, when the great truths of Christianity are laid before them, are touched; and, as the ever-bubbling spring of man's better nature wells up, as it often does among the most depraved, they feel their own insignificance and the importance of their future and eternal destiny.

Thoughtlessness and ignorance, two of the prolific sources of moral depravity, could be, I think, combatted to a great extent by a regular course of moral instructions, supplied to them in the shape of good reading matter for their leisure hours. From my standpoint, I am satisfied that many a poor, thoughtless sinner could be brought to a sense of his duty by such means. On the contrary, when their leisure moments are not occupied with religious reflections calculated to cheer them up and elevate their moral condition, they naturally fall into a state of gloom or exasperation, which has a tendency to retard reformation.

Confident that the hearts of many are still open to good sentiments, from the simple fact that some have, at the expiration of their term of sentence, called upon me to express their gratitude for the little good I had done for them.

Digitized by Google

Knowing the solicitude you have for all those under your charge, I hope this brief statement will not be ineffectual.

I remain, with due consideration,

Very respectfully yours,

J. GOENS,

Parish Priest. Salem.

SALEM, August 31st, 1868.

M. P. BERRY,

SUPERINTENDENT OF OREGON STATE PRISON:

SIR—In compliance with your request for a statement from the undersigned, relative to our visits to the Penitentiary as ministers of the Gospel:—Since the removal of the prisoners to this place, through the courtesy of the officers and Wardens, we have frequently visited the prisoners on Sabbath, and preached to them the past year, one or the other of us, nearly every Sabbath. The officers have ever welcomed us, and we have always found the prison clean and in good order for religious services. Bible class instructions have been imparted to those who were willing to receive them, after which all who were able attended preaching. Are orderly and attentive. *Some* give evidence of interest and profit. We have no doubt that these services tend to ameliorate their condition, and should be continued. They have been furnished with some Bibles and Testaments, hymn-books and tracts, and some miscellaneous reading, which they thankfully received. All our labors and books have been furnished free of expense to the Prison or State.

We suggest that a suitable library of useful books would greatly benefit them, and tend to moral elevation, and that the State could not better appropriate a reasonable amount of

Digitized by Google

money than to furnish these unfortunate persons with such reading and instruction as will best promote reformation. A number of the convicts are less than twenty years of age, and *most* are young men, and need good counsel. We trust the Legislature, in their wisdom, will do all that can legitimately be done to improve the condition of these prisoners, so that those who are from time to time released, may go out morally improved and become useful members of society—not to repeat acts of folly and crime.

Respectfully yours,

J. L. PARRISH,
A. F. WALLER.

REPORT OF BUILDING COMMISSIONERS.

To His Excellency
George L. Woods,
Governor of the State of Oregon:

The undersigned, Penitentiary Building Commissioners, have the honor to submit the following report:

The Superintendent of the prison, after having finished the prison buildings at present occupied, commenced to clear the grounds for future operations, and to furnish material for permanent buildings.

The Legislature of 1866, having made no appropriations, further than sufficient to finish the house at this time occupied as a prison, and to build quarters for the officers, all work in regard to more permanent improvements in that direction has been discontinued.

The Superintendent removed the brick yard established by

Digitized by Google

his predecessor, from the penitentiary enclosure to the grounds intended for Insane Asylum purposes, where clay for brick making can be obtained on land belonging to the State, thereby relieving us of the necessity of purchasing the clay used, as was formerly done.

Convicts have also been employed during the past winter in grubbing, clearing and ditching upon the Asylum grounds.

There was formerly some difference of opinion entertained regarding the best mode to be employed to furnish the proposed asylum with a necessary supply of water. That problem has been solved effectually by the simple process introduced and employed to furnish water for the prison and works.

We would respectfully suggest to your Excellency and to the Legislature the propriety of stopping the sale of the brick made by the convicts, and of ordering a sufficient quantity to be set aside for future use by the State in the construction of public buildings. One reason for the suggestion is that it will require a large amount of material to make the number of bricks that the State will need, and clay of the proper quality to be obtained upon the premises is scarce.

Should the Legislature deem it advisable to proceed with the proposed permanent buildings for the prison and Insane Asylum, or to construct a Capitol building, the plan of the Superintendent of the Penitentiary to furnish all the common laborers, and such mechanics as he has under his control, meets with our approbation, as this proposed method would not only furnish employment for the convicts, but most certainly would greatly reduce the cost of the buildings.

The law creating the Board of Commissioners authorized them in connection with the Governor, to dispose of the old penitentiary property at Portland. Accordingly, in July, 1867, we sold the old penitentiary building, and the State's title to the ground, to the Oregon Iron Works Company, reserving a large amount of iron window gratings, which are estimated to be worth to the State one thousand dollars.

Digitized by Google

The price obtained was six thousand dollars, gold coin, to be paid in three instalments of $2,000 00 each, on three, four and five years time, with ten per cent. interest from date, payable annually. The amount realized for the property was nearly double what it was estimated to be worth, by many citizens of Portland, whose judgment was entitled to consideration. Had the building been located upon land belonging to the State, as it was supposed to be when constructed, it would have brought perhaps double the amount obtained—but as less than one-third of the building was on State land, and the remainder on private property, the price for which it sold was all that could be made out of it.

The amount disbursed of the appropriation of ten thousand dollars made by the Legislature of 1866, for the finishing of the prison and other buildings, is $6,625 43.

Salem, August 31st, 1868.

REPORT

OF THE

ADJUTANT GENERAL.

HEADQUARTERS STATE OF OREGON,
ADJUTANT GENERAL'S OFFICE,
SALEM, September, 1868.

To HIS EXCELLENCY,
GEORGE L. WOODS,
Governor of the State of Oregon.

SIR:—In conformity with the requirements of the law of the State, I have the honor to submit herewith the following report of the transactions of this department since my last report, of September 1st, 1866, up to September 1st, 1868, inclusive.

SCHEDULE A.

An account of all monies received and expended since my last report.

SCHEDULE B.

An account of the expenditures under the direction of the Military Board of Auditors since my last report.

SCHEDULE C.

An account of all arms, accoutrements, ammunition,

Digitized by Google

ordnance stores, and military property of every description belonging to the State, from what source received, to whom issued, how expended and by whose order, and in whose possession the same may be.

SCHEDULE D.

The condition of the organized militia and of the enrolled militia.

SCHEDULE E.

Manifest of relief or additional-pay bonds issued to the First Regiment Cavalry, Oregon Volunteers, under provisions of an act of the Legislature approved Oct. 24, 1864. Certificates issued since my last report.

SCHEDULE F.

Manifest of bounty bonds issued to the Oregon Infantry and Cavalry Volunteers since my last report, commencing from the 15th of August, 1866, up to August 1st, 1867—being the balance of the entire amount of bounties issued under the provisions of the act granting bounties.

It will be seen by schedule A that I have sold eight tents. This I have done by and with the consent of the Military Board of Auditors, from the fact that the material from which the tents were made was not of the best quality, being only heavy domestic and not suitable for campaigning, and also being liable to be destroyed by moths and rats. On the disbandment of Co. A, 1st Reg't, 1st Brig., O. V. M., the arms and equipments were ordered turned over to the County Judge of Jackson county. There being a deficiency, as shown in account rendered, Captain Abel D. Helman promptly forwarded the value thereof, as will be seen by schedule A.

Digitized by Google

The disbursement by the Military Board of Auditors, as will be seen by schedule B, more properly belongs to my report of 1866, as most of the accounts audited and allowed grew out of the making up and publishing said report. I found it necessary, in order to meet the demands of the departments at Washington, and the heads of departments of the several States, to have several hundred copies of my report for that year printed and bound; and from that time to this the cost of running this department has been comparatively light.

It will be seen by schedule C that a large proportion of the arms, accoutrements and military stores belonging to the State are in charge and keeping of military companies, many of which are partially disbanded. This has been permitted for several reasons, one of which is the cost of the transportation of arms from one place to another; another reason was a hope that the companies would revive their organizations. Many of the arms in my keeping are sadly out of repair—not seriously damaged, but needing oiling and cleaning.

It will be seen by schedule D that the organized militia hardly deserves the name. The field and staff officers have not been changed under your Excellency's administration, and under the provisions of the law the officers appointed and commissioned by ex-Governor Addison C. Gibbs, hold their respective offices until their successors are duly appointed and qualified. The Washington Guards and Fenian Guards, of the First Regiment, Second Brigade, are the only companies in the State who have preserved intact their organizations.

In my report for 1866, I dwelt at length on the necessity of a more efficient militia law, and I had hoped that the Legislature then about to convene would have taken the

Digitized by Google

matter in hand and passed such a law, yet they failed to do so. Many of the leading members of that body, without regard to party politics, admitted the necessity and utility of the law. Surely there is no State in the Union more isolated than Oregon, and none more exposed and defenseless, and I fear that the day may come when we shall deeply regret our want of interest and attention to this matter. We are a young and growing State; then would it not be well to grow up to manhood in habits of order and discipline? The law which I prepared in 1866 I am confident would be a good and efficient one. It was drawn up after a careful study and investigation of the militia laws of many States, and with a heartfelt interest in the welfare of this. It would have instituted an organized body of men from three thousand to five thousand strong, ready to have taken the field at a moment's warning—not raw recruits, but well-drilled soldiers, having all the good qualifications of regulars, combined with the interest of citizens. This would have formed a nucleus around which the whole military strength of the State might have rallied, and made us almost invincible to any force an enemy might send among us.

The law provides that it shall be the duty of the assessor of each county in the State to make an annual assessment roll of every person in their respective counties liable to do military duty, and after the same being corrected, it becomes the duty of the county clerk of each county to cause a copy of this roll to be forwarded to this office. A failure of either officer to comply with the requirements of the law subjects them to a heavy fine; yet it will be seen by a reference to the schedule that only a few of the counties have made their returns to this office; in consequence of which I have been unable to make my returns to the President of the United States, as required by the laws of

Digitized by Google

this State, or to the Adjutant General of the United States, as required by the laws of Congress. In 1867 I called the attention of the county clerks failing to comply with the requirements of the law; but not desiring to put the State nor the counties to expense, I have neglected to call the attention of the several district attorneys to the facts, hoping that the Legislature now about to convene will enact an efficient militia law.

Schedules E and F exhibit the entire number of certificates issued both for Relief Bonds and Bounty Bonds up to September 1st of the present year. There are some few soldiers, and estates of deceased soldiers, who are yet entitled to Relief Bonds. These I do not make certificates for until lawful application is made for the same. All of the Bounty Bond certificates have been made up, the total number of which is two thousand seven hundred and fifty-six; making the total amount of certificates made up one hundred and thirty-seven thousand eight hundred dollars. In this number there are some three or four certificates made up by error, all of which have been held and noticed under the head of remarks, with only one exception; a single bond of fifty dollars was made up and issued before the error was noticed, the soldier having deserted two days prior to the time he would have been mustered out. And I will here remark that very few attempts have ever been made to obtain either bounty or relief bonds by fraud, or unjustly. This, I hold, is owing to the honesty of our soldiers and the system which was adopted in making up and delivering these bonds. I believe there has been but one discharge presented that was a forgery; this was detected at once, always having the genuine signature of the mustering officer present, and the muster out rolls also; this, combined with the system of registry adopted in the office, rendered it almost impossible for a fraud to have

Digitized by Google

been perpetrated. I observe by the report of the Adjutant General of California, (a State having a similar bounty and relief law to ours) that four hundred and seventy-six bounty and relief claims had been rejected for various causes, such as desertion, duplicate discharges, forgeries, &c., and had I not at the commencement procured books with proper headings, and written up the history of every man that was ever in the service of Oregon Volunteers, arranged alphabetically, giving his complete record, where born, when and where enlisted, who by, when and where mustered in, who by, in what company and what regiment, his full description, age, hight, &c., and what became of him, whether died in the service, promoted, discharged and for what cause, or deserted, according to the facts in the case, perhaps many more attempts would have been made to procure bonds unlawfully; and I sincerely believe that too great a valuation can hardly be placed upon these records.

Had this system of registration been adopted in the Indian war of 1855–6, many thousands of dollars would have been secured to our citizens who are to-day unable to obtain their claims for the want of reliable data to base them upon. I have partially succeeded in obtaining the papers belonging to the quartermaster general and adjutant general of the then territory of Oregon, in the war above referred to; the most important papers, however, I have not yet obtained, to wit: the quartermaster general's abstract of purchases, and the adjutant general's company muster rolls. I have used all due diligence to obtain these papers. Early in the year 1867, the following correspondence took place between Gen. Barnum and myself:

Digitized by Google

STATE OF OREGON,
ADJUTANT GENERAL'S OFFICE,
SALEM, Feb. 19th, 1867.

SIR:

I have the honor to respectfully represent, that parties interested, and those who took part in the Indian war of 1855–6 in the then Territory of Oregon, are constantly making application to me for information relative to that war, which information can only be obtained by referring to the muster rolls of the then adjutant general. You held that office at the time, and had the making up and was the custodian of those rolls. I made requsition on you for them early in the year 1863. I received no reply from you. I do not know that you received the communication. Shortly after, I saw Mr. W. C. Griswold, who informed me that he (Griswold) had the rolls; that you turned them over to him. He shortly after left for the Atlantic States. I then called on Messrs. Caton & Curl, Griswold's attorneys at the time. Mr. Caton informed me that Griswold had taken them with him. If I understand it, these rolls are the property of the State. It is of vital importance to many citizens of the State that these papers should be accessible. I therefore again make requisition on you for them, and I hope and expect that you will forward them without delay, as you are in honor and equity bound to do.

I am, Sir, your obed't servant,
CYRUS A. REED,
Adj.-Gen. of Oregon.

To E. M. BARNUM,
Late Adj.-General of the
Territory of Oregon, during
the Indian war of 1855–6.
New York City, N. Y.

Digitized by Google

To this communication I received the following reply, to wit:

NEW YORK, April 10th, 1867.

C. A. REED, ESQ.,
Adjutant General
of the State of Oregon:

DEAR SIR—

Your favor of the 19th of February has just come to hand. Upon my leaving Oregon, in 1861, the duplicate muster rolls of the Volunteer service in the Indian war of 1855–6, which I had prepared, I left in my office at Salem, in charge of The. Burmester, Esq., who was there a law student with me. These rolls subsequently, as I supposed, passed into the hands of Caton & Curl, as they were doing some business for me, and Mr. Caton had acted as my agent in the transaction of certain matters. I never turned them over to W. C. Griswold, and until the receipt of your letter did not know that he claimed to have them, but supposed Messrs. Caton & Curl still had them. Your letter of 1863, in which you state that you made requisition for the rolls, was not received by me. If it had come to hand, I think I should have ordered them turned over to your custody for the benefit of the volunteers whose names are borne on the rolls, and of all other parties interested in them.

In reply to your suggestion that those duplicate rolls are the property of the State of Oregon, I will frankly say that I do not so understand it, and will give you my reasons briefly:

Unlike the treatment which you have had the good fortune to receive at the hands of the Legislature of Oregon, I was never voted nor allowed a dollar for any time or services, or materials used in my office as adjutant general. I observe the Legislature dealt liberally with you, and

Digitized by Google

voted you two years' salary in advance. The general government, in allowing my claims for pay and service, cut it down about 400 per cent., and would not allow me anything after our volunteers were withdrawn from the field. The work of making up not only the original rolls but especially the duplicates, was therefore all done by me without any allowance or pay whatever, even for office rent, for stationery, for postage, for the very paper on which I made the duplicate rolls. I was not allowed a dollar by the general government, and certainly I never had a dime from the Territory or State of Oregon for any thing. Now I submit to you or any candid man, if, when even the paper, the ink, the office rent, to say nothing of my time and other expenditures, were furnished by myself, what claim has the State of Oregon to those rolls?

Nevertheless, do not understand me as making this point to withhold them from the use and benefit of the brave volunteers whose names and record of service are borne upon the same. I shall take immediate steps to ascertain how and where they are situated, and place them where they can be fairly inspected. But understand me: I do not recognize the lawful right of any person to obtain them by requisition. I shall be glad to place them in your hands, but it must be with the unqualified understanding that you receive them not officially, but simply as a private custodian, to be returned or otherwise disposed of at any time, as I may determine.

I am, very respectfully,

Yours,

E. M. BARNUM.

Address Box 5637,

New York.

To this letter I made the following reply, to wit:

Digitized by Google

STATE OF OREGON,
ADJUTANT GENERAL'S OFFICE,
SALEM, May 20th, 1867.

GEN. E. M. BARNUM,
Late Adjutant General Oregon,
New York City:

DEAR SIR—

I have the honor to acknowledge the receipt of yours of the 10th ultimo, in reply to which allow me to inform you that the State of Oregon has not dealt as liberally with me as you imagine. To-day, I am out of pocket over fifteen hundred dollars for labor performed in this office, for during two years of the war I devoted my entire time in the discharge of the duties of this office, for which service I received only eight hundred dollars per year, while it cost me at least sixteen hundred dollars per year to live. You were also in error in reference to my receiving my salary two years in advance. The law requires all appropriations from the Treasury to be made by the Legislature. The appropriation was made two years in advance; yet I draw my pay only at the end of each quarter. This much by way of explanation; not that it has any bearing on the question of the muster rolls of the Indian war of 1855–6. Now I have no desire to discuss the question as to how the muster rolls were made up, or by whom. Like the quartermaster and commissary departments in that war, the adjutant general's department is supposed to have been instituted for the public good. It has been generally conceded that those departments were paid as all other claims growing out of the war of that date, by an Act of Congress. If they were not, they certainly should have been. My only object in making the requisition on you for the rolls, was to satisfy the almost daily enquiries made to me rela-

Digitized by Google

tive to them, and that, too, by "the brave volunteers whose names and record of service are borne upon the same." The reception of the rolls will most certainly add to my official duties, without additional compensation. Should you cause those papers to be placed in my possession, I should not have the most distant desire to hinder you from obtaining all that you may be entitled to for labor or expense relative to them. As it is now, they are doing no one any good, and are preventing many from obtaining their just dues. Therefore I hope you will use all due diligence to place these papers in possession of this office; or if you prefer to turn them over to me as an individual, you can do so, as I should keep them in this office, where they would be accessible to parties interested. Hoping to hear from you soon,

I remain, very respectfully,
Your obedient servant,
CYRUS A. REED,
Adjutant General, Oregon.

I have received no reply to this last communication; yet the wife of Gen. Barnum, while on a visit here last spring, placed in my possession all of the papers that she could obtain relative to the transactions of that office, assuring me that Gen. Barnum had instructed her to do so; yet the company muster rolls (the most important papers,) cannot be found. Whether Mr. Griswold took them to the Atlantic States, as stated by Mr. Caton, or whether they have been mislaid or hid away, I am unable to determine. I am satisfied that Gen. Barnum has no design in keeping them from public use. Yet it is a great misfortune that these rolls and the quartermaster general's abstract of purchases cannot be obtained and placed where the public could have access to them.

During the year 1867, Gen. W. Seawell, U. S. A., chief

Digitized by Google

mustering and disbursing officer, military division of the Pacific, San Francisco, California, placed in my hands for investigation a quantity of suspended claims against the United States Government, created by the recruiting officers of Co. B, 1st Oregon Cavalry Volunteers. The following letter from Gen. S. will give some little idea of the amount of extra labor which grew out of the investigation:

UNITED STATES MUSTERING AND DISBURSING OFFICE,
SAN FRANCISCO, CALIFORNIA, February 14, 1867.

CYRUS A. REED,
Adjutant General
of the State of Oregon—

SIR: Your communication of the 19th ult., in relation to the claim of Captain E. J. Harding, for reimbursement of expenditures incurred in recruiting for the 1st Oregon Cavalry in 1861, is at hand. As requested, I enclose herewith transcripts from the vouchers in the claims presented by him, viz: two in his own name and one in the name of Cooke, Smith & Co., and marked respectively 1, 2 and 3. I also enclose list of items of provisions and wood alleged to have been furnished for the 1st Oregon Cavalry Volunteer Recruits, for which payment is claimed by Aaron Beck; these vouchers also being certified by Capt. Harding. The following is the information which should have been elicited in relation to these accounts, viz: Voucher 1, item 1, 1002 rations furnished—the names of the men, and dates from and to which supplied, respectively, should be given. Item 2, 3, 4, 5, 6, 7 and 8, camp equip'g and mess furniture, should have been accounted for on property returns to the adjutant general of the army; if this was not done, it must be clearly shown what disposition was made of the articles enumerated. (Items 9, 10, 11, 12 and 13—tools, &c., disallowed by the War Department as improper

Digitized by Google

charges against the funds for Coll. Drill and Org. Volunteers.) Item 14—wood, the number of men, and dates from and to which, entitled to fuel, should be given. Item 15 and 16—rent of rendezvous and stables, the dates from and to which, occupied should be given. Item 17 and 18—advertising and posters—copies of notices or posters (in duplicate) required; regulations of 1861 allowed insertions in two papers, *or in lieu*, posters to an equal amount, not exceeding $5.00 per month; is not the charge for advertising excessive? Item 19—examination of recruits—required, names of men examined and evidence of their actual muster into service. Item 20—stationery—the items and prices should be given in detail. The receipts of the persons supplying the above mentioned items should in each case (in duplicate) accompany the vouchers as sub-vouchers. Voucher 2—forage—should give names of the men for whose horses forage was furnished, and dates from and to which, so furnished, and be accompanied by receipts in duplicate of parties to whom payment was made. Voucher 3—forage—should show that the men furnished their own horses, and that the forage was furniahed subsequent to enrollment and prior to muster in. Claim of Aaron Beck—voucher A, provisions—the number and *names* of men for whom provisions were furnished, and the dates between which issued, should be given. Voucher B—wood—names of recruits entitled to fuel, and between what dates respectively, should be given. Any certificate or other papers which you may obtain, tending to establish the validity of these claims, please forward in duplicate, that they may be attached to the vouchers. Your suggestion as to authorizing you to take testimony of persons under oath in the premises is fully concurred in, and the authority given; but I am not empowered to authorize the incurrance of any expense thereby on the part of the gov-

Digitized by Google

ernment. I am sorry to put you to so much trouble; but any information you may be enabled to give from time to time, as called upon, in relation to the Oregon claims, will be equally serviceable to the government and claimants, in assisting to an equitable adjustment of those claims, many of which are exceedingly complicated, by reason of their irregularities and long standing.

I am, sir, very respectfully,

Your obedient servant,

(Signed) W. SEAWELL,

Chief Mustering and Disbursing Officer,

Mil'y Divis. Pacific.

The above communication is only one of many from that officer, forwarding claims, affidavits, etc., for examination and adjustment. All of the business has been faithfully performed by me, for which I have never received but two dollars compensation. I felt I could not decline acting in the premises, although there was no law compelling me to do so. In preparing and adjusting these claims, I believe I have given satisfaction both to the officers of the general government and the claimants—ever striving to arrive at the FACTS in the premises. I call your attention to these transactions, partially to give an idea of the labor performed in this office, and partially to show the necessity of doing business systematically and correctly from the beginning; for had these claims been properly and justly presented at first, they would have been paid long ago.

In regard to the continuation of this department, I am candidly of the opinion that it cannot be dispensed with for several years to come, at least—certainly not until all the claims liable to emenate by law from this office are fully adjusted. The Constitution of the State contemplates such an office, the laws of Congress require it, and the departments of the general government are constantly

Digitized by Google

making demands upon it. If we have an organized militia, which we should have, and which we eventually must have, the office of adjutant general would be all-important. The present salary of that officer is very low, and just as low as any responsible person can perform the duties of the office.

Company I (Capt. F. B. Sprague's company), 1st regiment of infantry, O. V., stationed at Fort Klamath, Oregon, has been mustered out of service since my last report; but as the full muster-roll of that company was published at that time, I do not deem it important to republish it at this time. The third installment of bounty due the comny can be seen by reference to schedule F, of this report.

I am, sir, very respectfully,

Your obedient servant,

CYRUS A. REED,

Adjutant General, Oregon.

REPORT

OF THE

STATE LIBRARIAN

TO THE

LEGISLATIVE ASSEMBLY OF OREGON.

FIFTH REGULAR SESSION,

SEPTEMBER, 1868.

SALEM, OREGON:
W. A. McPHERSON, STATE PRINTER.
1868.

RULES

OF THE

STATE LIBRARY.

RULE 1.

The Library shall be open to the public daily (Sundays excepted) from the hours of nine in the morning till four in the afternoon; and during the sessions of the Supreme Court and Legislative Assembly, from the hours of seven in the forenoon to nine in the afternoon of each day thereof, and also during the sessions of the Circuit Court for the Third Judicial District, when convened at the Capital.

RULE 2.

Whenever the Library is open, the Librarian shall be in attendance. He shall preserve order, and exclude, if necessary, any disorderly person. He shall prevent smoking and loud talking, and all noises inappropriate to the quietness of a place of study.

RULE 3.

No person shall be allowed to remove a book from the Library, except the Federal and State officers and members of the Legislative Assembly during the sessions thereof, and members of the Bar during the sessions of Court.

RULE 4.

The right to take and retain books by the members of the Bar and the Legislature shall be limited to the time the

Digitized by Google

Courts or Legislature may be in session; and no person shall keep a book from the Library more than ten days, except by special permission.

RULE 5.

The Librarian shall keep a record, in which all books taken from the Library shall be entered.

RULE 6.

No book shall be removed until receipted for, or entered in the Librarian's Record.

SAMUEL E. MAY, *Superintendent.*

Whole number of Books now in the Library.....3, 301

All the expenses of the Library have been met by the Superintendent, Hon. S. E. May.

In pursuance of the direction of the last Legislature, Reports have been added to the Library, until there are now complete series of the decisions of New York, Kentucky and Massachusetts. The decisions of the courts of some of the other States are frequently desired, as well by the Judges of the Supreme Court, as by the bar in attendance thereon. It is respectfully suggested that some provision be made by your honorable body for completing the Reports of such of the other

Digitized by Google

States as might be deemed most important. Some of the fragmentary series now in the Library would require a few volumes to complete them ; of others, only a few volumes are in the Library, and to complete them would require considerable outlay of money. A committee of competent persons, appointed by your honorable body for that purpose, could better ascertain, upon examination of the Library, what books are most needed, and such other information as your honorable body might require in the premises.

Respectfully submitted,

P. H. HATCH,
State Librarian.

REPORT.

To His Excellency GEO. L. WOODS,
Governor of the State of Oregon:

In compliance with law, we herewith transmit our third biennial report of the condition of the "Oregon Hospital for the Insane."

Whole number of State and private patients remaining in the Hospital September 1, 1866:

Males	59
Females	21
Total	80

Number of patients admitted from September 1st, 1866, to September 1st, 1868:

Males	42
Females	19
Total	61

Whole number of State and private patients treated in the Hospital from September 1st, 1866, to September 1st, 1868:

Males	102
Females	39
Total	141

The number of State and private patients discharged, from September 1st, 1866, to September 1st, 1868, was fifty.

Digitized by Google

Of those discharged, were

	Males.	*Females.*	*Total.*
Cured	18	8	26
Improved	2	2	4
Not insane		1	1
Died	13	3	16
Escaped	3		3
	36	14	50

Number remaining in Hospital, September 1st, 1868:

Males	66
Females	25
Total	91

Of the patients discharged cured, nine were inmates of the Hospital less than three months; six, between three and six months; seven, between six months and one year; and four, for more than one year.

Of those discharged improved, two were under treatment less than three months, and two for more than one year.

Thirteen males and three females have died since our last report.

Of those deaths, five resulted from pulmonary consumption; one from organic disease of the brain; four from epilepsy and general debility; one from acute mania; two from the exhaustion of chronic mania; one from epileptic convulsions; and two from physical injuries to the brain.

NATIVITY.

Of the ninety-one patients now remaining in the Hospital, fifty-seven are natives of the United States; twelve of Ireland; ten of Germany; two of Norway; one of France;

Digitized by Google

one of Austria; one of Scotland; one of England; three of Canada; one of China; and two are half-breeds.

FORM OF INSANITY.

Of those remaining, the form of disease is, mania, sixty; monomania, five; melancholia, four; dementia, sixteen; and idiocy, six.

Of the whole number now on hand, thirty-two are considered curable; forty-two incurable; eleven doubtful; and six are idiotic.

Three private patients were reported in the Hospital, September 1st, 1866, and two have been received since; all of whom have been discharged cured.

The ratio of recoveries to the admissions is forty-three per cent.

The deaths amount to eleven per cent. of the number treated.

The highest number of patients at any one time was ninety-four; the lowest number, eighty; and the average number under treatment during the whole period, State and private, was eighty-seven.

The number of males in the Hospital since our last report, was one hundred and two; and the number of females, thirty-nine.

The highest number of males, at any one time, was sixty-eight; and the highest number of females, twenty-five. The lowest number of males, at any one time, was fifty-nine; and the lowest number of females, twenty-one.

For the past four years, the percentage of recoveries has been forty-three, and will compare favorably with the results of the best institutions of our country. This gratifying state of facts stimulates us to continued efforts in behalf of those

Digitized by Google

placed under our care, so that they may soon be restored to reason, and to their friends.

The large number of those considered incurable and doubtful, shows conclusively the great importance of the early treatment of the insane. But, even amongst this class, there are doubtless some who, by proper and continued treatment, will yet recover and become useful citizens.

In this connection, we cannot withhold a few quotations from some of the most learned physiological writers in our country. Dr. Thomas S. Kirkbride, of the Pennsylvania Hospital for the Insane, says:

"It becomes the officers of Hospitals for the Insane steadily to impress on the friends of patients, and themselves, to remember how difficult it is to say that any one is absolutely incurable. Every case, no matter what its character or duration, should be placed under the circumstances believed to be most favorable to secure a restoration, and should be steadily kept there. If the patients do not then recover, they will probably improve, and, at any rate, will not become worse from lack of proper care and treatment.

"It is behind the age, at this day, to speak of institutions for incurables. If there were no other objections to them—and there are many grave ones—the fact that Omniscience alone can tell with certainty who are in this condition, should be sufficient.

"Among the pleasant results of treatment in this institution within the last three years, has been the recovery of an unusual number whose diseases, from their long continuance and discouraging character, seemed to offer but the faintest hope of a favorable change. Every such case is an important lesson, and teaches more forcibly than any essay that can be written, the value of hope and a perseverance that will not yield on account of discouragements in hospitals for the in-

Digitized by Google

sane, and that the arrangements of no institution can well be too good for even the most unpromising class of patients. Although the practice is often exactly the reverse, still it is not the less true that the most unfortunate and unpromising class of patients require some of the highest attributes of Christian character, and the most discriminating intelligence, for their proper management."

In the association of medical superintendents of the various insane asylums in the United States, held in 1867, in discussing this proposition, Dr. C. H. Nichols, superintendent of the Government insane asylum at Washington, said:

"Asylums exclusively for the chronic dependent insane will, in my judgment, if established under the most favorable circumstances, be attended with untold moral suffering on the part of their unhappy inmates. The skillful and humane care of the chronic in connection with the acute insane, is more economical than the separate skillful and humane care of the chronic insane can possibly be made.

"I am aware that it is asserted that the chronic insane can be properly supported by themselves at less cost than they can be in first-class (sometimes called curative) institutions, but I have not at any time, from any source, read or heard what appears to me to be the shadow of an argument to support the assertion. I am in favor of large institutions, in which the usual proportions of chronic and curable insane in a particular community are treated, because reason and experience both teach that the demands of the most enlightened philanthrophy can be fully met at less cost per individual in large than in small collections of the insane."

In a convention of the superintendents of the poor of the State of New York, called to discuss the condition and relief of the insane poor, it was "resolved, that insane persons considered curable, and those supposed incurable, should not be provided for in separate establishments."

Digitized by Google

HEALTH.

But few cases of acute diseases have occurred since our last report, and those have readily yielded to treatment. The causes which have contributed largely to this continued state of good health, are, healthy location, perfect drainage of the premises, an abundant supply of pure spring water, the cleanliness and thorough ventilation of the buildings, nutritious and well-cooked food, and exercise in the open air at all times when the weather would permit; to these, in conjunction with such medical treatment as each special case demanded, are to be attributed the favorable results which we have to report, and the general good health that has prevailed, and still prevails, amongst the inmates of our institution.

We take pride in saying—and we believe we are not overstating the facts—that our patients appear to be as well cared for in every respect as those of the same class in any institution in the Union.

DEATHS BY VIOLENCE.

Two cases of homicide have unfortunately occurred since our last report, and were committed by a patient who has been an inmate of the Hospital for nearly five years, and during this whole time had never manifested the least disposition to injure any one. The circumstances surrounding the first case appeared to warrant the belief that it was more of accident than of design, but in order to guard against all danger, as we thought, he was confined to the house. A few weeks subsequent to the first act, the Warden, one morning, upon opening the patient's door, found him standing there with a heavy slat which he had wrenched from his bedstead, and with which he aimed a blow at the Warden, who retreated, followed by the patient. At this time, one of the other inmates, who had just come from his bed, and seeing the

Digitized by Google

trouble, endeavored to interfere, whereupon he turned and dealt him such a heavy blow as to fracture the skull, which resulted in death within a few hours.

While such cases are deeply to be regretted, and should at all times be guarded against by all reasonable means at our command, yet the experience of all who have the charge of insane patients, teaches that, after every effort and device has been exhausted, such cases will, from time to time, unfortunately occur.

These two cases, which transpired within a few weeks of each other, are the only deaths by violence that we have had to record since the establishment of this institution, a period of more than six years.

No case of suicide has ever occurred in this Hospital, notwithstanding many and persistent efforts have been made by patients determined to end their days in this manner. Those who are not familiar with asylums, can know but little of the continued care and vigilance required to guard these unfortunate beings from the taking of their own lives, or that of those immediately around them.

It is a noticeable fact that, of the sixteen deaths which we have reported as having occurred during the past two years, but one resulted from acute disease; all the others, with the exception of two from violence, were doomed from the very nature of their diseases. We regard this as a high compliment to the healthfulness of the locality and the various surroundings which give tone and vigor to the system, thus warding off physical disease and affording to the brain and nervous system the very best opportunity of recovering their normal tone and condition.

IMPROVEMENTS.

Since our last report, we have made several valuable improvements, thereby adding greatly to the comfort of the

Digitized by Google

patients and to the convenience of the institution. A beautiful fir grove has been surrounded by a high fence, adding largely to the pleasure ground. In this quiet, shady retreat, where the temperature of the most sultry day is pleasant, the patients resort at all times, when the weather will permit, and spend their time in the various exercises and amusements provided for them, watched over by faithful and competent wardens.

A wash and dry house has also been erected, and has facilitated greatly the operations in this special department.

ESCAPES.

The escapes for the past two years have been less, by one-half, than for the preceding period of two years.

The number of patients admitted, has been less, by one-third, than they were for the two previous years, and the increase has been less than one-third.

To your Excellency, we tender our sincere thanks for the continued interest manifested in the prosperity of the Asylum and the welfare of its inmates, and also for the personal kindness and encouragement extended to ourselves.

To Dr. J. S. Giltner, State Visiting Physician, we return our acknowledgments for his professional aid, counsel, and courtesy, and for his strict attendance to the duties of his position in behalf of the State and its wards.

To our Superintendent, Matron, and Wardens, our thanks are due for the faithful performance of the varied and arduous duties of their several positions, and for their kindness and consideration always manifested to those under their charge.

In conclusion, permit us to express the hope that this most

Digitized by Google

unfortunate class of our fellow-citizens, for whom we have labored for years to provide a comfortable home, with kind and judicious treatment, shall in the future receive whatever of kindness and charity it may require to still afford to them these blessings.

J. C. HAWTHORNE,
A. M. LORYEA.

REPORT.

PORTLAND, Sept. 7, 1868.

To his Excellency, GEORGE L. WOODS,
Governor of Oregon:

SIR:—I have the honor to submit the following report on the condition of the Insane Asylum of the State of Oregon; for two years, ending August 31st, 1868.

In compliance with my official duties I have visited the Asylum monthly, for the purpose of examining the patients, and inspecting the premises, and seeing that the contractors, Drs. J. C. Hawthorne and A. M. Loryea, performed their part of the agreement in a faithful and satisfactory manner.

I have taken pains during all this time to ascertain that the patients received the necessary care and attention, so as to render general satisfaction to the people, with the determination that nothing should be wanting that would in any way be conducive to their bodily health and comfort; and nothing has been left undone that would further the attainment of that end.

The resident physicians have done all in their power to make this a first-class institution, and to-day it is an evidence of their success, they having succeeded in bringing it up to the highest standard, thus making it a credit to our State.

I shall refer your Excellency to the statistics of the resident physicians, embodied in their biennial report to you, which, upon careful examination, I find agree in every respect with my own. The largest proportion, according to the statistics, belongs to the laboring class, and the conclusions derived therefrom make it manifest to an observer that continuous hard labor, with an insufficient amount of mental

Digitized by Google

recreation, is highly conducive to, and exercises a strong influence over, the mind, and causes the development of diseases of that organ. Mechanical occupations, requiring a greater amount of mental labor, have a tendency to decrease the ratio; and if we carry the investigations among the learned professions—the literary and scientific—whose minds are in constant activity, with a small amount of physical labor to perform, the ratio decreases considerably. This goes to prove conclusively that in order to maintain a healthy condition of the mind, we must increase the mental labor, and decrease the physical. There must be more recreation among the laboring classes of our population, if we would lessen the number of our insane. In order to check the rapid increase of this appalling infliction, annually on the increase, it becomes necessary to alleviate the physical condition, and lighten the burdens now oppressing our laboring classes, and increase their facilities for attaining a higher grade of mental culture.

Of the total number (141) who have been treated since August 31, 1866, twenty-two and a half (22½) per cent. have been cured; and, compared with the number of admissions, sixty-one (61) from the above-named date, forty-nine (49) per cent. have been cured, and improved. This bears a favorable comparison with other institutions. The deaths amount to eleven (11) per cent. of the whole number treated, and indicates the healthy condition of the Asylum. The report further shows the admission of a patient, (a female), who was not insane. This was either carelessness, or ignorance, on the part of the examining physician. Too much care cannot be exercised in such examinations, as an irreparable injury is done by pronouncing a sane person insane; and for the purpose of doing justice to other counties of the State, I will state that she was from Multnomah county.

I would suggest the propriety of having all persons, before their admission to the Asylum, taken before the inspecting

Digitized by Google

physician for examination, and if he considers them of unsound mind, require him to certify officially to that effect. This would be a safeguard against occurrences of the kind in the future.

The number remaining on the 31st day of August, 1868, was (91) ninety-one; of this number (49) forty-nine, including (6) six idiotic patients are chronic, nearly all of whom are considered as incurable, and medical treatment of no avail. Care and comfort, with proper hygienic regulations, is all that is necessary, and may eventually be the means of restoring some of them that now appear hopeless. The remainder, (31) thirty one are considered curable. Including the (11) eleven doubtful ones, we have (42) forty-two who are amenable to treatment, many of whom are now rapidly improving. These cases require special medical treatment, and no doubt a large majority of them will be restored to reason, who otherwise would remain permanently demented, and eke out a miserable existence in the Asylum. Special provision ought to be made for daily instructions to be given to all idiotic patients in the rudiments of English education, and some trade or manual labor that would enable them, at some future time, to support themselves. There are six idiots now in the Asylum. Four out of that number would in a short time be able to support themselves.

The most productive cause of insanity in this State is *self-abuse*. Fifty (50) per cent. of the whole number who have undergone treatment, and yet remaining, can trace their unfortunate condition, either directly or indirectly, to this degrading vice. The indications are that it is increasing at a fearful rate among the youth of the land, and unless something is done to check it, many who now have a bright future before them will become inmates of an Insane Asylum, or an Almshouse. In all communities we meet with the victims of this abominable vice, in a state of premature decay, who might be restored by friendly advice. "A decline" and

Digitized by Google

"consumption" get the credit for most of these untimely deaths.

Next on the list comes intemperance, as having furnished the second highest number of our insane. Twenty (20) per cent. of the entire number was brought to insanity by the use of alcoholic stimulants alone. In its direct effect, it sends forth the raving maniac. Softening of the brain is the result, when a mild form obtains, when idiocy or complete stupor follows. It is horrible to contemplate, that the most deplorable condition that befalls man should be caused by the monstrous and growing evil of intemperance.

Domestic afflictions, pecuniary losses, and religious excitement, furnish the remainder, and most of them can be traced to families wherein a hereditary tendency already exists.

One more cause I will mention, not heretofore spoken of, which is exclusively among females, and arises from uterine derangement, or more generally speaking, suppression of the menses. These cases generally recover after the functional derangement is corrected.

In the summer of 1866, several acres of ground, shaded by a beautiful fir grove, were enclosed with a high board fence, and well provided with swings and various other fixtures for gymnastic exercise, for the benefit and amusement of the inmates; also, games of ball, draughts, and quoits were introduced, all of which is calculated to divert their attention and produce a soothing effect on the mind.

The following named articles constitute the diet: Meats: Beef, pork, mutton, and salmon, both fresh and salted. Vegetables—Potatoes, cabbage, turnips, onions, tomatoes, parsnips, lettuce, beets, beans, peas, etc. Drink—Coffee and tea. Fruit—Of various kinds in season; and dried, when out of season. Bread of the best quality is supplied in abundance. Sugar and molasses are furnished at all the meals.

The building is divided off into wards, each one of which contains a water closet, and a bath room, with hot and cold

Digitized by Google

water for bathing purposes, constantly kept in good order. This is a great convenience, and greatly adds to the health of the patients. The whole building is constantly kept scrupulously clean and thoroughly ventilated.

The dining rooms, kitchen, and bake house are well supplied with all the necessary fixtures, and the most improved utensils are provided, all of which are kept neatly and in proper order.

The dispensary connected with the place is always supplied with a good stock of standard drugs, and is always kept in excellent condition.

Sewing and knitting and ironing is the employment of the females. They manufacture the greater part of the clothing worn by the males, and all that is worn by themselves; affording them light employment, and relieving the monotony of their confinement. A limited number of the convalescent males is employed at different kinds of out-door work on the farm and in the gardens. It would be a great advantage if more were so employed, as it would hasten their restoration; but the limited number of attendants will not admit of it. The clothing worn by the males is of Oregon manufacture, of good quality; and that of the females is calicoes—and all are constantly kept neat and clean.

The supply of water comes from an excellent spring, which is thrown into a large reservoir. The reservoir is on a high tower, built expressly for this purpose, with hose attached of sufficient length to discharge water on any part of the building.

During my official connection with this institution, little discipline has been required; and what has been resorted to has been of the mildest form; and but few instances have occurred, to my knowledge, requiring any. Upon several occasions, it became necessary to confine the hands of patients, to prevent them from injuring themselves and others; and some had to be confined to their rooms for several days.

Digitized by Google

Kind treatment and firmness have much influence in restraining this class of patients, and, when strictly adhered to, has given the best satisfaction.

I have to report the occurrence of two accidents, whereby two of the inmates lost their lives at the hand of one of the patients. In both these cases I made a thorough investigation, and found no blame attached to any one.

Much credit should be awarded to John Kenworthy, the efficient Superintendent, for the manner in which he has conducted the affairs of the institution for the past two years. His loss could not well be supplied on this coast, and I hope he may be spared to us for a long time to come, for the benefit of the patients and the interest of the State.

While giving credit to all the Wardens for the management of their wards, I must make especial mention of Mr. Beatty, and commend him for the uniform good order and cleanliness of his ward.

There is much that might properly be said here, but it would be only a repitition of what has been already said in the report of Drs. Hawthorne and Loryea. Trusting that I have so performed the duties of my office as to meet with your Excellency's approval,

I have the honor to be

Your ob't serv't,

J. S. GILTNER, M. D.,

Visiting Physician of the Insane Asylum.

REPORT

OF THE

PILOT COMMISSIONERS

FOR

1868,

TO THE

LEGISLATIVE ASSEMBLY OF OREGON.

TOGETHER WITH THEIR

Report to the Legislative Assembly in 1866.

Fifth Regular Session.

SEPTEMBER, 1868.

SALEM, OREGON:
W. A. McPHERSON, STATE PRINTER.
1868.

REPORT

OF THE

PILOT COMMISSIONERS,

FOR 1868.

To the Honorable the Legislative Assembly
of the State of Oregon:

The report of the undersigned members of the Board of Pilot Commissioners for the Columbia River Bar and Columbia and Willamette Rivers, respectfully represents, that we have visited the Columbia Bar twice in each year, for the last two years, and proceeded out over the Bar in the pilot-boat California, A. Crosby, commander, to examine her qualifications, as required by the laws of Oregon, and find that the pilot-boat California is in every way qualified for a pilot-boat on the Columbia River and Bar.

Since the report to the Legislature two years ago, there has been kept on the Columbia river a sail pilot-boat, well supplied, for the relief of any vessel in distress, and four capable pilots, who have given general satisfaction in their business. The prices for piloting vessels that come within the purview of the pilot laws are ten dollars per foot for vessels drawing ten feet or under, and two dollars additional for every foot over twelve.

On the Columbia and Willamette rivers, branches to four pilots have been granted, to skillful and competent persons, who have also given general satisfaction. The

Digitized by Google

prices established for their rates are four dollars per foot, from Astoria to Portland or Vancouver, each way, and rates proportionate to distance taken for intermediate distances.

There has been no offer in the last two years by any parties to put a tug-boat on the Columbia Bar, in conformity to the Act of October the 21st, 1864—(see Statutes of Oregon, sec. 22, page 843)—nor since the Rabboni, a steam tug put on by Paul Corno and others, and withdrawn after a few months' services for want of support, on account of the opposition steamers driving all the sailing vessels off at that time. The piloting has ever since been conducted by a sail vessel. But as the trade is now being done to a considerable extent by sail vessels, we begin to feel the need of a good tug to facilitate commerce; therefore, to induce the putting on a tug, we would respectfully recommend that the State, through her Legislature, offer a subsidy sufficient to induce competent parties to keep a powerful tug-boat on the bar; or, otherwise, appropriate a sufficient sum to build one, and let the State, through her Pilot Commissioners, control it.

The corps of the U. S. Coast Survey have just finished the survey of the mouth of the Columbia river, including the bar; and although they are not allowed to publish their work in general until the report to the proper bureau at Washington has been submitted, yet we have learned indirectly that their survey has developed the fact that the bar is wide and deep enough to admit vessels of two thousand tons and upwards, the depth of water being not less than twenty-four feet, at low tide, on the shoalest part, and the average rise of tide being about eight feet, gives us thirty-two feet of water at ordinary high tide. The greatest difficulty, and that which has caused the loss of vessels and

Digitized by Google

so many lives, is the change of wind, which very often occurs right on the bar, or by vessels becoming becalmed on it, which occurs occasionally. But a tug would obviate all these difficulties. Had a good tug been on the bar the last few years, the dreadful accidents that have occurred would have been prevented. In an economical point of view, the State will be largely the gainer by the proper encouragement of sail vessels, which is the principal medium of opening up foreign trade, and increasing the facilities for crossing the Columbia river bar at all times will conduce much to that end.

Annexed hereto will be found a statement of the number of vessels that have crossed the Columbia bar between the 1st of July, 1866, and the 24th of August, 1868, with their tonnage, taken from the official records in the office of the Collector of Custom, at Astoria.

All of which is respectfully submitted by

JOHN H. COUCH,
J. TAYLOR,
WILLIAM F. KIPPEN, } Pilot Com'rs.

This 15th day of September, 1868.

REPORT

OF THE

PILOT COMMISSIONERS,

FOR 1866.

To the Honorable the Legislative Assembly
of the State of Oregon:

We, the undersigned, Pilot Commissioners of the State of Oregon for the Columbia and Willamette Rivers, submit the following, viz:

By comparison of the following statistics with our former reports to the Legislature, it will be seen that the commerce on these rivers is rapidly on the increase.

The arrivals and departures of vessels over the Columbia river bar, from Sept. 30, 1864, to Sept. 10, 1866, with their tonnage, is as follows:

Number of steam vessels arrived	114	their tonnage			117,740
" sail " "	75	"	"		21,350
" steam vessels departed	113	"	"		118,861
" sail " "	78	"	"		22,028
Total vessels arrived	189	"	"		139,090
Total vessels departed	191	"	"		140,889

The commerce over said bar is now done mostly by steam vessels, being an average of about eight in and eight out each month.

The amendatory act passed at last regular session of the

Digitized by Google

Legislature to the Pilot law, giving exclusive privilege to pilot on the Columbia river bar, when a suitable number of pilots put on said bar a good steam tug boat and should apply for the same—all of which conditions were complied with, and branches were issued about the 1st of September, 1865, to three competent pilots to use said boat.

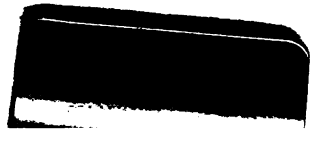
But within the last year there has been a great change in conducting the commerce of the country, as you will see by the above showing that steamers now do the principal part of the business formerly done by sailing vessels, thus obviating, in a great measure, the necessity for a steam tug; and as the tug was proving an unprofitable investment to its owners in consequence thereof, it was by them withdrawn from that service about the 1st of April last.

The former pilots, still having a good sail pilot boat at their command for that purpose, branches were granted to four experienced pilots, who use said boat, and the business of piloting has gone on since without further interruption.

The pilot laws of this State need remodeling, or modifying, so as to meet the improvements and changes in our commercial matters; and in so doing, care should be had not to grant exclusive monopolies; yet ample protection must be given to licensed pilots, or else we will soon be left without any on the Columbia river bar.

The Act of Congress of July last, giving the right to captains or commanders of steamers, if found qualified, to pilot their own vessels, will militate very much against keeping up a good complement of pilots on the bar by the State regulations, unless well protected by enactments.

There will still be some sail vessels arriving from and departing for foreign ports—not enough, however, to justify the expense of a pilot boat exclusive of piloting the steamers. The Act of Congress referred to will, in its



Digitized by Google

operation, benefit California to the detriment of Oregon, unless our State laws are amended to meet the case.

The piloting done on the Columbia and Willamette rivers is done by about four pilots, two of whom have taken out State branches; the others are piloting under licenses from U. S. Commission. The laws of this State ought to be so framed as to give more uniformity and efficiency in its operation with regard to river branches.

The undersigned, having visited the Columbia river bar, and done all other things needful in carrying out the laws on the subject, most respectfully beg leave to submit this, their report.

J. TAYLOR,
FRED. KETCHUM,
JOHN H. COUCH,
} Pilot Com'rs.
